83 /100

AI-Readable

Executive summary

This site is mostly readable by AI tools, with a few improvements still recommended. Key strengths include AI guidance file and plain-text page access, while homepage access and crawler policy need attention. Recommended next step: review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.

Recommended next step

- 1. Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.
- 2. Fix robots.txt syntax issues so each rule uses Field: value format, directives appear under a User-agent, and Sitemap entries use absolute URLs.

Signal breakdown

Crawlability Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.	Warn 10/20
Robots.txt Fix robots.txt syntax issues so each rule uses Field: value format, directives appear under a User-agent, and Sitemap entries use absolute URLs.	Warn 7.5/15
llms.txt The llms.txt file was found and includes the expected text, length, heading, and URL signals.	Pass 15/15
Sitemap The sitemap.xml file is valid and contains URL entries.	Pass 10/10

Markdown support	Pass	15/15
The homepage returns markdown content when requested with Accept: text/markdown, giving AI systems a cleaner text representation with less navigation chrome to parse.		
Semantic HTML	Pass	10/10
The homepage has a valid title, meta description, heading structure, semantic landmarks, substantial body copy, and descriptive anchor text.		
Structured data	Pass	10/10
Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.		
Content signals	Pass	5/5
Consider adding Content-Signal HTTP header, AI-specific head meta tags, robots noai/noimageai directive so AI systems can consistently discover content usage preferences across robots.txt, HTTP headers, and HTML metadata.		

Suggested fixes

llms.txt
MARKDOWN
<pre># Watchgoose - Cron Job Monitoring & Heartbeat Alerts > Cron job monitoring that alerts you when a scheduled task, backup, queue, or script misses its heartbeat. Free to start - no credit card required. This llms.txt file summarizes the public, canonical resources that AI assistants and crawlers should use to understand this site. ## Site Overview - Canonical URL: https://watchgoose.com/ - Site type: software application - Recommended summary: Cron job monitoring that alerts you when a scheduled task, backup, queue, or script misses its heartbeat. Free to start - no credit card required. ## Core URLs - [Homepage](https://watchgoose.com/): Primary public entry point and canonical site overview. - [Pricing](https://watchgoose.com/pricing/): Pricing, plans, and packaging information. - [Docs](https://watchgoose.com/docs/): Documentation and implementation guidance for the site. - [Log in](https://watchgoose.com/accounts/login/): Important public page discovered from the homepage navigation.</pre>

robots.txt additions

TXT

```
# robots.txt additions
# Copy these blocks into the existing robots.txt file. Keep current rules
unless a note calls out a conflicting Disallow.

# AI crawler access
# Add explicit Allow rules for blocked AI crawlers; remove or narrow
conflicting Disallow rules if your crawler target requires precedence.

Content-Signal

TXT

Content-Signal recommendations

Use these directives to make AI-use preferences explicit for compliant crawlers and AI systems. They are advisory signals, so keep them aligned with robots.txt, terms, and access controls.

Recommended values

- ai-train=no: AI model training, fine-tuning, and dataset creation.
- search=yes: AI search indexing, snippets, and discovery.
- ai-input=yes: AI answer grounding, retrieval, and generated-response context.

HTTP response header

```
'''http
Content-Signal: ai-train=no, search=yes, ai-input=yes
Content-Usage: train-ai=n
'''
```

Best for site-wide or route-specific policies because the signal travels with every response, including pages that AI systems fetch directly.

HTML meta tag alternatives

Add these inside the document '`<head>`' when server headers are not
