

OVERALL SCORE

96 /100

AI - Ready

Executive summary

This site is in strong shape for AI discovery and readability. Key strengths include homepage access and crawler policy, while page structure needs attention. Recommended next step: shorten the meta description to 160 characters or fewer. Avoid skipped heading levels so sections progress from h1 to h2 to h3 without gaps. Add missing semantic elements: article.

Recommended next step

- 1. Shorten the meta description to 160 characters or fewer. Avoid skipped heading levels so sections progress from h1 to h2 to h3 without gaps. Add missing semantic elements: article.

Signal breakdown

Crawlability Pass 20/20

The homepage resolves, connects, returns HTTP 200 OK, exposes a canonical URL, and is not blocked by robots.txt.

Robots.txt Pass 15/15

robots.txt allows crawler access and includes Sitemap references.

llms.txt Pass 15/15

The llms.txt file was found and includes the expected text, length, heading, and URL signals.

Sitemap Pass 10/10

The sitemap.xml file is valid and contains URL entries.

Markdown support	Pass	15/15
The homepage returns markdown content when requested with Accept: text/markdown, giving AI systems a cleaner text representation with less navigation chrome to parse.		
Semantic HTML	Warn	5.7/10
Shorten the meta description to 160 characters or fewer. Avoid skipped heading levels so sections progress from h1 to h2 to h3 without gaps. Add missing semantic elements: article.		
Structured data	Pass	10/10
Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.		
Content signals	Pass	5/5
Consider adding AI-specific head meta tags, robots noai/noimageai directive, Content-Signal robots.txt directive so AI systems can consistently discover content usage preferences across robots.txt, HTTP headers, and HTML metadata.		

Suggested fixes

llms.txt
MARKDOWN
DelphiRank: Visibilita per Hotel
> Misura come ChatGPT, Gemini e Perplexity vedono il tuo hotel. DelphiRank analizza la tua presenza nelle risposte AI e ti dice esattamente cosa fare per emergere.
This llms.txt file summarizes the public, canonical resources that AI assistants and crawlers should use to understand this site.
Site Overview
- Canonical URL: https://delphirank.ai/ - Site type: organization - Recommended summary: Misura come ChatGPT, Gemini e Perplexity vedono il tuo hotel. DelphiRank analizza la tua presenza nelle risposte AI e ti dice esattamente cosa fare per emergere.
Core URLs
- [Homepage](https://delphirank.ai/): Primary public entry point and canonical site overview. - [Come Funziona - Analisi per Hotel](https://delphirank.ai/come-funziona): Important public page discovered from the homepage navigation. - [Pricing - Analisi per Hotel](https://delphirank.ai/pricing): Pricing, plans, and packaging information. - [Chi Siamo - Analisi per Hotel](https://delphirank.ai/chi-siamo): Continued in the full scan report...

Content-Signal

```
TXT
# Content-Signal recommendations

Use these directives to make AI-use preferences explicit for compliant crawlers and AI systems. They are advisory signals, so keep them aligned with robots.txt, terms, and access controls.

## Recommended values

- ai-train=no: AI model training, fine-tuning, and dataset creation.
- search=yes: AI search indexing, snippets, and discovery.
- ai-input=yes: AI answer grounding, retrieval, and generated-response context.

## HTTP response header

'''http
Content-Signal: ai-train=no, search=yes, ai-input=yes
Content-Usage: train-ai=n
'''

Best for site-wide or route-specific policies because the signal travels with every response, including pages that AI systems fetch directly.

## HTML meta tag alternatives

Add these inside the document '<head>' when server headers are not
