

OVERALL SCORE

99 /100

AI -Ready

Executive summary

This site is in strong shape for AI discovery and readability. Key strengths include homepage access and crawler policy, while page structure needs attention. Recommended next step: add missing semantic elements: main, article, nav, footer.

Recommended next step

- 1. Add missing semantic elements: main, article, nav, footer.

Signal breakdown

|                                                                                                                                                                        |      |       |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-------|
| Crawlability                                                                                                                                                           | Pass | 20/20 |
| The homepage resolves, connects, returns HTTP 200 OK, exposes a canonical URL, and is not blocked by robots.txt.                                                       |      |       |
| Robots.txt                                                                                                                                                             | Pass | 15/15 |
| robots.txt allows crawler access and includes Sitemap references.                                                                                                      |      |       |
| llms.txt                                                                                                                                                               | Pass | 15/15 |
| The llms.txt file was found and includes the expected text, length, heading, and URL signals.                                                                          |      |       |
| Sitemap                                                                                                                                                                | Pass | 10/10 |
| The sitemap.xml file is valid and contains URL entries.                                                                                                                |      |       |
| Markdown support                                                                                                                                                       | Pass | 15/15 |
| The homepage returns markdown content when requested with Accept: text/markdown, giving AI systems a cleaner text representation with less navigation chrome to parse. |      |       |

|                                                                                                                                                                                                                                        |      |        |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|--------|
| <b>Semantic HTML</b>                                                                                                                                                                                                                   | Warn | 8.6/10 |
| Add missing semantic elements: main, article, nav, footer.                                                                                                                                                                             |      |        |
| <b>Structured data</b>                                                                                                                                                                                                                 | Pass | 10/10  |
| Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.                                                                                                                                            |      |        |
| <b>Content signals</b>                                                                                                                                                                                                                 | Pass | 5/5    |
| Consider adding AI-specific head meta tags, robots noai/noimageai directive, Content-Signal robots.txt directive so AI systems can consistently discover content usage preferences across robots.txt, HTTP headers, and HTML metadata. |      |        |

Suggested fixes

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

## robots.txt additions

### TXT

```
# robots.txt additions
# Copy these blocks into the existing robots.txt file. Keep current rules
unless a note calls out a conflicting Disallow.

# Crawl-rate guidance
# Add Crawl-delay under a User-agent block when the site needs gentler
crawler pacing.
User-agent: *
Crawl-delay: 10
```

## Content-Signal

**TXT**

# Content-Signal recommendations

Use these directives to make AI-use preferences explicit for compliant crawlers and AI systems. They are advisory signals, so keep them aligned with robots.txt, terms, and access controls.

## Recommended values

- ai-train=no: AI model training, fine-tuning, and dataset creation.
- search=yes: AI search indexing, snippets, and discovery.
- ai-input=yes: AI answer grounding, retrieval, and generated-response context.

## HTTP response header

```
'''http
Content-Signal: ai-train=no, search=yes, ai-input=yes
Content-Usage: train-ai=n
'''
```

Best for site-wide or route-specific policies because the signal travels with every response, including pages that AI systems fetch directly.

## HTML meta tag alternatives

Add these inside the document '`<head>`' when server headers are not
