

OVERALL SCORE

34 /100

Poor

Executive summary

This site is difficult for AI tools to read right now. The main areas needing attention are plain-text page access and sitemap. Recommended next step: add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Recommended next step

1. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
2. Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.
3. Regenerate sitemap.xml with valid XML and a sitemap <urlset> or <sitemapindex> root element.
