PUBLIC AI VISIBILITY REPORT

recordstore01.myshopify.com

Scanned Aug 6, 2026, 11:02 UTC

OVERALL SCORE

75 /100

AI-Readable

Executive summary

This site is mostly readable by AI tools, with a few improvements still recommended. Key strengths include homepage access and AI guidance file, while plain-text page access and crawler policy need attention. Recommended next step: add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Recommended next step

1. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
2. Fix robots.txt syntax issues so each rule uses Field: value format, directives appear under a User-agent, and Sitemap entries use absolute URLs.
3. Add a meta description between 50 and 160 characters. Add missing semantic elements: article.

Signal breakdown

Crawlability

Pass 20/20

The homepage resolves, connects, returns HTTP 200 OK, exposes a canonical URL, and is not blocked by robots.txt.

Robots.txt

Warn 7.5/15

Fix robots.txt syntax issues so each rule uses Field: value format, directives appear under a User-agent, and Sitemap entries use absolute URLs.

llms.txt

Pass 15/15

The llms.txt file was found and includes the expected text, length, heading, and URL signals.

Sitemap

Pass 10/10

The sitemap index is valid and the checked child sitemap contains URL entries.

Markdown support

Fail 0/15

Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Semantic HTML

Warn 7.1/10

Add a meta description between 50 and 160 characters. Add missing semantic elements: article.

Structured data

Pass 10/10

Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.

Content signals

Pass 5/5

Consider adding Content-Signal HTTP header, AI-specific head meta tags, robots noai/noimageai directive so AI systems can consistently discover content usage preferences across robots.txt, HTTP headers, and HTML metadata.

Suggested fixes

llms.txt

MARKDOWN

```
# Record Store 01

> Record Store 01

This llms.txt file summarizes the public, canonical resources that AI
assistants and crawlers should use to understand this site.

## Site Overview

- Canonical URL: https://recordstore01.myshopify.com/
- Site type: organization
- Recommended summary: Record Store 01

## Core URLs

- [Homepage](https://recordstore01.myshopify.com/): Primary public entry
point and canonical site overview.
- [Catalog](https://recordstore01.myshopify.com/collections/all): Important
public page discovered from the homepage navigation.
- [Collection](https://recordstore01.myshopify.com/collections): Important
public page discovered from the homepage navigation.
- [Glasses](https://recordstore01.myshopify.com/collections/glasses):
Important public page discovered from the homepage navigation.
-
[Blog](https://recordstore01.myshopify.com/blogs/discover-the-joy-of-vinyl-r
ecords-554):

robots.txt additions

TXT

```
# robots.txt additions
# Copy these blocks into the existing robots.txt file. Keep current rules
unless a note calls out a conflicting Disallow.

# Sitemap discovery
# Add this top-level directive so search and AI crawlers can discover the
canonical sitemap.
Sitemap: https://recordstore01.myshopify.com/sitemap.xml

# AI crawler access
# Add explicit Allow rules for AI crawlers so public content permissions are
clear.

Content-Signal

TXT

```
# Content-Signal recommendations

Use these directives to make AI-use preferences explicit for compliant
crawlers and AI systems. They are advisory signals, so keep them aligned
with robots.txt, terms, and access controls.

## Recommended values

- ai-train=no: AI model training, fine-tuning, and dataset creation.
- search=yes: AI search indexing, snippets, and discovery.
- ai-input=yes: AI answer grounding, retrieval, and generated-response
context.

## HTTP response header

‘‘‘http
Content-Signal: ai-train=no, search=yes, ai-input=yes
Content-Usage: train-ai=n
‘‘‘

Best for site-wide or route-specific policies because the signal travels
with every response, including pages that AI systems fetch directly.

## HTML meta tag alternatives

Add these inside the document ‘<head>‘ when server headers are not
