PUBLIC AI VISIBILITY REPORT

metaop.ai

Scanned Jun 23, 2026, 08:33 UTC

OVERALL SCORE

31 /100

Poor

Executive summary

This site is difficult for AI tools to read right now. The main areas needing attention are plain-text page access and sitemap. Recommended next step: add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Recommended next step

1. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
2. Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.
3. Regenerate sitemap.xml with valid XML and a sitemap <urlset> or <sitemapindex> root element.

Signal breakdown

Crawlability

Warn 10/20

Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.

Robots.txt

Warn 7.5/15

Fix robots.txt syntax issues so each rule uses Field: value format, directives appear under a User-agent, and Sitemap entries use absolute URLs.

llms.txt

Warn 7.5/15

Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

Sitemap

Fail 0/10

Regenerate sitemap.xml with valid XML and a sitemap `<urlset>` or `<sitemapindex>` root element.

Markdown support

Fail 0/15

Add content negotiation for `Accept: text/markdown` on the homepage and return a markdown representation with `Content-Type: text/markdown`. Keep the HTML response for regular browser requests.

Semantic HTML

Warn 5.7/10

Shorten the meta description to 160 characters or fewer. Avoid skipped heading levels so sections progress from h1 to h2 to h3 without gaps. Add missing semantic elements: main, article.

Structured data

Fail 0/10

Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.

Content signals

Fail 0/5

Add the standard directive `'Content-Signal: ai-train=no, search=yes, ai-input=yes'` to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

Suggested fixes

Fix Structured data

HTML

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@graph": [
    {
