Needs Work

### Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include homepage access and crawler policy, while AI guidance file and plain-text page access need attention. Recommended next step: publish an AI guidance file as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

### Recommended next step

1. Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.
2. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
3. Prefer valid JSON-LD and include Organization or WebSite schema.org types in valid JSON-LD for clearer AI interpretation.

### Signal breakdown

|                                                                                                                                                       |      |       |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|------|-------|
| <div>Crawlability</div> <div>The homepage resolves, connects, returns HTTP 200 OK, exposes a canonical URL, and is not blocked by robots.txt.</div>   | Pass | 20/20 |
| <div>Robots.txt</div> <div>robots.txt allows crawler access and includes Sitemap references.</div>                                                    | Pass | 15/15 |
| <div>llms.txt</div> <div>Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.</div> | Fail | 0/15  |

|                                                                                                                                                                                               |      |       |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-------|
| <b>Sitemap</b>                                                                                                                                                                                | Pass | 10/10 |
| The sitemap index is valid and the checked child sitemap contains URL entries.                                                                                                                |      |       |
| <b>Markdown support</b>                                                                                                                                                                       | Fail | 0/15  |
| Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests. |      |       |
| <b>Semantic HTML</b>                                                                                                                                                                          | Pass | 10/10 |
| The homepage has a valid title, meta description, heading structure, semantic landmarks, substantial body copy, and descriptive anchor text.                                                  |      |       |
| <b>Structured data</b>                                                                                                                                                                        | Warn | 5/10  |
| Prefer valid JSON-LD and include Organization or WebSite schema.org types in valid JSON-LD for clearer AI interpretation.                                                                     |      |       |
| <b>Content signals</b>                                                                                                                                                                        | Fail | 0/5   |
| Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.        |      |       |

# Suggested fixes

## Fix Structured data

HTML

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@graph": [
    {
      "@type": "Organization",
      "@id": "https://x-mathai.com/#organization",
      "name": "Math Solver by Screenshot with XMath AI | Chrome Extension",
      "description": "Math Solver by screenshot with XMath AI. Upload or capture math problems in Chrome and get step-by-step AI explanations. Free to install.",
      "url": "https://x-mathai.com/",
      "logo": "https://x-mathai.com/assets/icon128.png"
    },
    {
      "@type": "WebSite",
      "@id": "https://x-mathai.com/#website",
      "name": "Math Solver by Screenshot with XMath AI | Chrome Extension",
      "description": "Math Solver by screenshot with XMath AI. Upload or capture math problems in Chrome and get step-by-step AI explanations. Free to install.",
      "url": "https://x-mathai.com/",
      "publisher": {
        "@id": "https://x-mathai.com/#organization"
      }
    },
    {
      "inLanguage": "en"
    }
  ]
}
```

## Fix Content signals

HTML

```
<meta http-equiv="Content-Signal" content="ai-train=no, search=yes, ai-input=yes" />
<meta name="content-signal" content="ai-train=no, search=yes, ai-input=yes" />
```
