PUBLIC AI VISIBILITY REPORT

www.luduvigo.com

Scanned Jun 20, 2026, 10:00 UTC

OVERALL SCORE

86 /100

AI-Ready

Executive summary

This site is in strong shape for AI discovery and readability. Key strengths include crawler policy and AI guidance file, while homepage access and page structure need attention. Recommended next step: serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.

Recommended next step

1. Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.
2. Shorten the meta description to 160 characters or fewer. Add missing semantic elements: article. Add visible body copy after script and style removal so the page has at least 200 words.

Signal breakdown

Crawlability

Warn 10/20

Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.

Robots.txt

Pass 15/15

robots.txt allows crawler access and includes Sitemap references.

llms.txt

Pass 15/15

The llms.txt file was found and includes the expected text, length, heading, and URL signals.

Sitemap

Pass 10/10

The sitemap.xml file is valid and contains URL entries.

Markdown support

Pass 15/15

The homepage returns markdown content when requested with Accept: text/markdown, giving AI systems a cleaner text representation with less navigation chrome to parse.

Semantic HTML

Warn 5.7/10

Shorten the meta description to 160 characters or fewer. Add missing semantic elements: article. Add visible body copy after script and style removal so the page has at least 200 words.

Structured data

Pass 10/10

Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.

Content signals

Pass 5/5

Consider adding AI-specific head meta tags, robots noai/noimageai directive, Content-Signal robots.txt directive so AI systems can consistently discover content usage preferences across robots.txt, HTTP headers, and HTML metadata.

Suggested fixes

llms.txt

MARKDOWN

```
# luduvigo - Paolo Antonio Rossi | Founder & CEO of Gorilli
```

```
> Paolo Antonio Rossi (luduvigo) - Founder & CEO of Gorilli. Building products in AI and Web3. Writing about product engineering, startups, AI agents, and the crypto ecosystem.
```

```
This llms.txt file summarizes the public, canonical resources that AI assistants and crawlers should use to understand this site.
```

```
## Site Overview
```

```
- Canonical URL: https://www.luduvigo.com/
- Site type: person
- Recommended summary: Paolo Antonio Rossi (luduvigo) - Founder & CEO of Gorilli. Building products in AI and Web3. Writing about product engineering, startups, AI agents, and the crypto ecosystem.
```

```
## Core URLs
```

```
- [Homepage](https://www.luduvigo.com/): Primary public entry point and canonical site overview.
- [Projects](https://www.luduvigo.com/projects): Important public page discovered from the homepage navigation.
- [Writing](https://www.luduvigo.com/writing): Important public page discovered from the homepage navigation.
- [About](https://www.luduvigo.com/about): Background information about the

Content-Signal

TXT

Content-Signal recommendations

Use these directives to make AI-use preferences explicit for compliant crawlers and AI systems. They are advisory signals, so keep them aligned with robots.txt, terms, and access controls.

Recommended values

- ai-train=no: AI model training, fine-tuning, and dataset creation.
- search=yes: AI search indexing, snippets, and discovery.
- ai-input=yes: AI answer grounding, retrieval, and generated-response context.

HTTP response header

```
```http
Content-Signal: ai-train=no, search=yes, ai-input=yes
Content-Usage: train-ai=n
```
```

Best for site-wide or route-specific policies because the signal travels with every response, including pages that AI systems fetch directly.

HTML meta tag alternatives

Add these inside the document ``<head>`` when server headers are not
