Needs Work

## Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include homepage access and crawler policy, while AI guidance file and plain-text page access need attention. Recommended next step: publish an AI guidance file as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

## Recommended next step

1. Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.
2. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
3. Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

## Signal breakdown

### Crawlability

Pass 20/20

The homepage resolves, connects, returns HTTP 200 OK, exposes a canonical URL, and is not blocked by robots.txt.

### Robots.txt

Pass 15/15

Add Sitemap directives to robots.txt so crawlers can find canonical sitemap files.

### llms.txt

Fail 0/15

Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

## Sitemap

Pass 10/10

The sitemap index is valid and the checked child sitemap contains URL entries.

## Markdown support

Fail 0/15

Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

## Semantic HTML

Warn 5.7/10

Shorten the meta description to 160 characters or fewer. Avoid skipped heading levels so sections progress from h1 to h2 to h3 without gaps. Add missing semantic elements: article.

## Structured data

Pass 10/10

Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.

## Content signals

Fail 0/5

Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

## Suggested fixes

### Fix Content signals

#### HTML

```
<meta http-equiv="Content-Signal" content="ai-train=no, search=yes, ai-input=yes" />
<meta name="content-signal" content="ai-train=no, search=yes, ai-input=yes" />
```
