OVERALL SCORE

51 /100

Needs Work

Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include AI guidance file and sitemap, while plain-text page access and structured data need attention. Recommended next step: add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Recommended next step

1. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
2. Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.
3. Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.

Signal breakdown

Crawlability

Warn 10/20

Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.

Robots.txt

Warn 7.5/15

Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access.

llms.txt

Pass 15/15

The llms.txt file was found and includes the expected text, length, heading, and URL signals.

Sitemap

Pass 10/10

The sitemap.xml file is valid and contains URL entries.

Markdown support

Fail 0/15

Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Semantic HTML

Warn 8.6/10

Add missing semantic elements: article.

Structured data

Fail 0/10

Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.

Content signals

Fail 0/5

Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

Suggested fixes

Fix Structured data

HTML

```
<script type="application/ld+json">
{
"@context": "https://schema.org",
"@graph": [
{
"@type": "Organization",
"@id": "https://www.pulserepo.com/#organization",
"name": "PulseRepo - GitHub alerts to Telegram",
"description": "Get beautifully formatted GitHub & Vercel event
notifications straight to your Telegram. No dashboard noise.",
"url": "https://www.pulserepo.com/",
"logo": "https://www.pulserepo.com/logo-192.png"
},
{
"@type": "WebSite",
"@id": "https://www.pulserepo.com/#website",
"name": "PulseRepo - GitHub alerts to Telegram",
"description": "Get beautifully formatted GitHub & Vercel event
notifications straight to your Telegram. No dashboard noise.",
"url": "https://www.pulserepo.com/",
"publisher": {
"@id": "https://www.pulserepo.com/#organization"
},
"inLanguage": "en"
}
]
}

Fix Content signals

HTML

```
<meta http-equiv="Content-Signal" content="ai-train=no, search=yes,
ai-input=yes" />
<meta name="content-signal" content="ai-train=no, search=yes, ai-input=yes"
/>
```
