

OVERALL SCORE

70 /100

AI-Readable

Executive summary

This site is mostly readable by AI tools, with a few improvements still recommended. Key strengths include crawler policy and AI guidance file, while plain-text page access and content signals need attention. Recommended next step: add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Recommended next step

1. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
2. Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.
3. Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

Signal breakdown

Crawlability Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.	Warn 10/20
Robots.txt robots.txt allows crawler access and includes Sitemap references.	Pass 15/15
llms.txt The llms.txt file was found and includes the expected text, length, heading, and URL signals.	Pass 15/15

Sitemap	Pass	10/10
The sitemap index is valid and the checked child sitemap contains URL entries.		
Markdown support	Fail	0/15
Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.		
Semantic HTML	Pass	10/10
The homepage has a valid title, meta description, heading structure, semantic landmarks, substantial body copy, and descriptive anchor text.		
Structured data	Pass	10/10
Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.		
Content signals	Fail	0/5
Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.		

Suggested fixes

Fix Content signals
HTML
<pre><meta http-equiv="Content-Signal" content="ai-train=no, search=yes, ai-input=yes" /> <meta name="content-signal" content="ai-train=no, search=yes, ai-input=yes" /></pre>
