

OVERALL SCORE

77 /100

AI-Readable

Executive summary

This site is mostly readable by AI tools, with a few improvements still recommended. Key strengths include homepage access and crawler policy, while plain-text page access and content signals need attention. Recommended next step: add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Recommended next step

- 1. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
- 2. Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.
- 3. Avoid skipped heading levels so sections progress from h1 to h2 to h3 without gaps. Add missing semantic elements: article.

Signal breakdown

|                                                                                                                                             |      |       |
|---------------------------------------------------------------------------------------------------------------------------------------------|------|-------|
| <p>Crawlability</p> <p>The homepage resolves, connects, returns HTTP 200 OK, exposes a canonical URL, and is not blocked by robots.txt.</p> | Pass | 20/20 |
| <p>Robots.txt</p> <p>robots.txt allows crawler access and includes Sitemap references.</p>                                                  | Pass | 15/15 |
| <p>llms.txt</p> <p>The llms.txt file was found and includes the expected text, length, heading, and URL signals.</p>                        | Pass | 15/15 |

|                                                                                                                                                                                               |      |        |
