PUBLIC AI VISIBILITY REPORT

# founderstack.tech

Scanned Jul 1, 2026, 11:01 UTC

OVERALL SCORE

**18** /100

Poor

## Executive summary

This site is difficult for AI tools to read right now. Key strengths include content signals, while homepage access and crawler policy need attention. Recommended next step: remove AI crawler Disallow: / rules or replace them with narrower path-level restrictions for private content only.

## Recommended next step

1. Remove AI crawler Disallow: / rules or replace them with narrower path-level restrictions for private content only.
2. Remove AI crawler Disallow: / rules or add narrower Allow/Disallow rules if AI crawlers should be able to discover public content.
3. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

## Signal breakdown

### Crawlability

Fail 0/20

Remove AI crawler Disallow: / rules or replace them with narrower path-level restrictions for private content only.

### Robots.txt

Fail 0/15

Remove AI crawler Disallow: / rules or add narrower Allow/Disallow rules if AI crawlers should be able to discover public content.

### llms.txt

Warn 7.5/15

Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

## Sitemap

Fail 0/10

Regenerate sitemap.xml with valid XML and a sitemap <urlset> or <sitemapindex> root element.

## Markdown support

Fail 0/15

Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

## Semantic HTML

Warn 5.7/10

Add exactly one h1 element that describes the page topic. Add missing semantic elements: main, article, nav, footer. Add visible body copy after script and style removal so the page has at least 200 words.

## Structured data

Fail 0/10

Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.

## Content signals

Pass 5/5

Consider adding Content-Signal HTTP header, AI-specific head meta tags, robots noai/noimageai directive so AI systems can consistently discover content usage preferences across robots.txt, HTTP headers, and HTML metadata.

## Suggested fixes

### Fix Structured data

#### HTML
