Needs Work

Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include AI guidance file and sitemap, while plain-text page access and content signals need attention. Recommended next step: add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Recommended next step

1. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
2. Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.
3. Fix robots.txt syntax issues so each rule uses Field: value format, directives appear under a User-agent, and Sitemap entries use absolute URLs.

Signal breakdown

Crawlability Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.	Warn 10/20
Robots.txt Fix robots.txt syntax issues so each rule uses Field: value format, directives appear under a User-agent, and Sitemap entries use absolute URLs.	Warn 7.5/15
llms.txt The llms.txt file was found and includes the expected text, length, heading, and URL signals.	Pass 15/15

Sitemap	Pass	10/10
The sitemap.xml file is valid and contains URL entries.		
Markdown support	Fail	0/15
Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.		
Semantic HTML	Warn	7.1/10
Shorten the meta description to 160 characters or fewer. Add missing semantic elements: article, nav.		
Structured data	Warn	5/10
Prefer valid JSON-LD and include Organization or WebSite schema.org types in valid JSON-LD for clearer AI interpretation.		
Content signals	Fail	0/5
Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.		

Suggested fixes

Fix Structured data

HTML

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@graph": [
    {
      "@type": "Organization",
      "@id": "https://skribbl.dev/#organization",
      "name": "AI agent orchestration - a home for coding agents | Skribbl",
      "description": "AI agent orchestration for a fleet of coding agents, on one infinite canvas. Claude Code, Codex, Gemini and Grok run as real terminals; draw a line between two of them and one can command the other. Multi-agent coding with your own auth, and a meter that says what it costs.",
      "url": "https://skribbl.dev/",
      "logo": "https://skribbl.dev/icon.svg?dd947af09cb0f3d4",
      "sameAs": [
        "https://x.com/skribbldev"
      ],
    },
    {
      "@type": "WebSite",
      "@id": "https://skribbl.dev/#website",
      "name": "AI agent orchestration - a home for coding agents | Skribbl",
      "description": "AI agent orchestration for a fleet of coding agents, on one infinite canvas. Claude Code, Codex, Gemini and Grok run as real terminals; draw a line between two of them and one can command the other. Multi-agent coding with your own auth, and a meter that says what it costs.",
      "Continued in the full scan report..."
    }
  ]
}
```

Fix Content signals

HTML

```
<meta http-equiv="Content-Signal" content="ai-train=no, search=yes, ai-input=yes" />
<meta name="content-signal" content="ai-train=no, search=yes, ai-input=yes" />
```
