AI-Readable

Executive summary

This site is mostly readable by AI tools, with a few improvements still recommended. Key strengths include crawler policy and AI guidance file, while content signals and homepage access need attention. Recommended next step: add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to the crawler policy file, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

Recommended next step

- 1. Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.
- 2. Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.
- 3. Shorten the meta description to 160 characters or fewer. Avoid skipped heading levels so sections progress from h1 to h2 to h3 without gaps. Add missing semantic elements: main, article, nav, footer.

Signal breakdown

Crawlability	Warn	10/20
Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.		
Robots.txt	Pass	15/15
robots.txt allows crawler access and includes Sitemap references.		
llms.txt	Pass	15/15
The llms.txt file was found and includes the expected text, length, heading, and URL signals.		

Sitemap	Pass	10/10
The sitemap.xml file is valid and contains URL entries.		
Markdown support	Pass	15/15
The homepage returns markdown content when requested with Accept: text/markdown, giving AI systems a cleaner text representation with less navigation chrome to parse.		
Semantic HTML	Warn	5.7/10
Shorten the meta description to 160 characters or fewer. Avoid skipped heading levels so sections progress from h1 to h2 to h3 without gaps. Add missing semantic elements: main, article, nav, footer.		
Structured data	Pass	10/10
Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.		
Content signals	Fail	0/5
Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.		

Suggested fixes

Fix Content signals
HTML
<pre><meta http-equiv="Content-Signal" content="ai-train=no, search=yes, ai-input=yes" /> <meta name="content-signal" content="ai-train=no, search=yes, ai-input=yes" /></pre>
