

OVERALL SCORE

31 /100 Poor

Executive summary

This site is difficult for AI tools to read right now. Key strengths include AI guidance file and sitemap, while homepage access and crawler policy need attention. Recommended next step: remove AI crawler Disallow: / rules or replace them with narrower path-level restrictions for private content only.

Recommended next step

- 1. Remove AI crawler Disallow: / rules or replace them with narrower path-level restrictions for private content only.
- 2. Remove the GPTBot Disallow: / rule or add narrower Allow/Disallow rules if GPTBot should be able to discover public content.
- 3. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

|                                                                                                                              |      |       |
|------------------------------------------------------------------------------------------------------------------------------|------|-------|
| Crawlability                                                                                                                 | Fail | 0/20  |
| Remove AI crawler Disallow: / rules or replace them with narrower path-level restrictions for private content only.          |      |       |
| Robots.txt                                                                                                                   | Fail | 0/15  |
| Remove the GPTBot Disallow: / rule or add narrower Allow/Disallow rules if GPTBot should be able to discover public content. |      |       |
| llms.txt                                                                                                                     | Pass | 15/15 |
| The llms.txt file was found and includes the expected text, length, heading, and URL signals.                                |      |       |

|                                                                                                                                                                                               |      |        |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|--------|
| <b>Sitemap</b>                                                                                                                                                                                | Pass | 10/10  |
| The sitemap index is valid and the checked child sitemap contains URL entries.                                                                                                                |      |        |
| <b>Markdown support</b>                                                                                                                                                                       | Fail | 0/15   |
| Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests. |      |        |
| <b>Semantic HTML</b>                                                                                                                                                                          | Warn | 5.7/10 |
| Shorten the meta description to 160 characters or fewer. Avoid skipped heading levels so sections progress from h1 to h2 to h3 without gaps. Add missing semantic elements: article.          |      |        |
| <b>Structured data</b>                                                                                                                                                                        | Fail | 0/10   |
| Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.                                                                  |      |        |
| <b>Content signals</b>                                                                                                                                                                        | Fail | 0/5    |
| Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.        |      |        |

# Suggested fixes

## Fix Structured data

HTML

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@graph": [
    {
      "@type": "Organization",
      "@id": "https://aigardendesign.app/#organization",
      "name": "AI Garden Design: Upload a Photo, See It Redesigned in 15+ Styles",
      "description": "Upload a photo of your garden and see it redesigned in 60 seconds. 15+ styles: Modern, Japanese, Tropical, Mediterranean. No design skills needed. Plans from $19/mo.",
      "url": "https://aigardendesign.app/",
      "logo": "https://aigardendesign.app/apple-icon.png?apple-icon.abbb2bbd.png"
    },
    {
      "@type": "WebSite",
      "@id": "https://aigardendesign.app/#website",
      "name": "AI Garden Design: Upload a Photo, See It Redesigned in 15+ Styles",
      "description": "Upload a photo of your garden and see it redesigned in 60 seconds. 15+ styles: Modern, Japanese, Tropical, Mediterranean.No design skills needed. Plans from $19/mo.",
      "url": "https://aigardendesign.app/",
      "publisher": {
        "@id": "https://aigardendesign.app/#organization"
      }
    },
    {
      "inLanguage": "en"
    }
  ]
}
```

## Fix Content signals

HTML

```
<meta http-equiv="Content-Signal" content="ai-train=no, search=yes, ai-input=yes" />
<meta name="content-signal" content="ai-train=no, search=yes, ai-input=yes" />
```
