

OVERALL SCORE

76 /100

AI-Readable

Executive summary

This site is mostly readable by AI tools, with a few improvements still recommended. Key strengths include homepage access and AI guidance file, while plain-text page access and crawler policy need attention. Recommended next step: add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Recommended next step

1. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
2. Fix robots.txt syntax issues so each rule uses Field: value format, directives appear under a User-agent, and Sitemap entries use absolute URLs.
3. Add missing semantic elements: main.

Signal breakdown

Crawlability	Pass	20/20
The homepage resolves, connects, returns HTTP 200 OK, exposes a canonical URL, and is not blocked by robots.txt.		
Robots.txt	Warn	7.5/15
Fix robots.txt syntax issues so each rule uses Field: value format, directives appear under a User-agent, and Sitemap entries use absolute URLs.		
llms.txt	Pass	15/15
The llms.txt file was found and includes the expected text, length, heading, and URL signals.		

Sitemap	Pass	10/10
The sitemap.xml file is valid and contains URL entries.		
Markdown support	Fail	0/15
Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.		
Semantic HTML	Warn	8.6/10
Add missing semantic elements: main.		
Structured data	Pass	10/10
Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.		
Content signals	Pass	5/5
Consider adding Content-Signal HTTP header, AI-specific head meta tags, robots noai/noimageai directive so AI systems can consistently discover content usage preferences across robots.txt, HTTP headers, and HTML metadata.

MARKDOWN

```
# Beel. - API de facturacion Verifactu y Stripe en 1 clic

> Facturacion Verifactu: conecta Stripe en 1 clic o integrala por API y cada cobro queda facturado y registrado en la AEAT. Sandbox gratis.

This llms.txt file summarizes the public, canonical resources that AI assistants and crawlers should use to understand this site.

## Site Overview

- Canonical URL: https://beel.es/
- Site type: organization
- Recommended summary: Facturacion Verifactu: conecta Stripe en 1 clic o integrala por API y cada cobro queda facturado y registrado en la AEAT. Sandbox gratis.

## Core URLs

- [Homepage](https://beel.es/): Primary public entry point and canonical site overview.
- [Reservar demo](https://beel.es/demo): Important public page discovered from the homepage navigation.

Content-Signal

```
TXT
# Content-Signal recommendations

Use these directives to make AI-use preferences explicit for compliant crawlers and AI systems. They are advisory signals, so keep them aligned with robots.txt, terms, and access controls.

## Recommended values

- ai-train=no: AI model training, fine-tuning, and dataset creation.
- search=yes: AI search indexing, snippets, and discovery.
- ai-input=yes: AI answer grounding, retrieval, and generated-response context.

## HTTP response header

'''http
Content-Signal: ai-train=no, search=yes, ai-input=yes
Content-Usage: train-ai=n
'''

Best for site-wide or route-specific policies because the signal travels with every response, including pages that AI systems fetch directly.

## HTML meta tag alternatives

Add these inside the document '<head>' when server headers are not
