Needs Work

Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include AI guidance file and plain-text page access, while homepage access and crawler policy need attention. Recommended next step: remove AI crawler Disallow: / rules or replace them with narrower path-level restrictions for private content only.

Recommended next step

- 1. Remove AI crawler Disallow: / rules or replace them with narrower path-level restrictions for private content only.
- 2. Remove AI crawler Disallow: / rules or add narrower Allow/Disallow rules if AI crawlers should be able to discover public content.

Signal breakdown

Crawlability Fail 0/20

Remove AI crawler Disallow: / rules or replace them with narrower path-level restrictions for private content only.

Robots.txt Fail 0/15

Remove AI crawler Disallow: / rules or add narrower Allow/Disallow rules if AI crawlers should be able to discover public content.

llms.txt Pass 15/15

The llms.txt file was found and includes the expected text, length, heading, and URL signals.

Sitemap Pass 10/10

The sitemap.xml file is valid and contains URL entries.

Markdown support	Pass	15/15
The homepage returns markdown content when requested with Accept: text/markdown, giving AI systems a cleaner text representation with less navigation chrome to parse.		
Semantic HTML	Pass	10/10
The homepage has a valid title, meta description, heading structure, semantic landmarks, substantial body copy, and descriptive anchor text.		
Structured data	Pass	10/10
Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.		
Content signals	Pass	5/5
Consider adding robots noai/noimageai directive so AI systems can consistently discover content usage preferences across robots.txt, HTTP headers, and HTML metadata.		

Suggested fixes

llms.txt
MARKDOWN
FindMyICP - Meet Your Top 5 at Any Luma Event
> Tell our AI your goal. We rank the room before the event and hand you five people worth meeting. Free to start.
This llms.txt file summarizes the public, canonical resources that AI assistants and crawlers should use to understand this site.
Site Overview
- Canonical URL: https://www.findmyicp.com/
- Site type: organization
- Recommended summary: Tell our AI your goal. We rank the room before the event and hand you five people worth meeting. Free to start.
Core URLs
- [Homepage](https://www.findmyicp.com/): Primary public entry point and canonical site overview.
- [Sign in](https://www.findmyicp.com/auth): Important public page discovered from the homepage navigation.
- [Speak with founder](https://cal.com/aniruddhg/findmyicp): Important public page discovered from the homepage navigation.
- [FoundersIdentify key investors and strategic partners before stepping onto the floor.](https://www.findmyicp.com/founders): Important public page discovered from the homepage navigation.

robots.txt additions

TXT

```
# robots.txt additions
# Copy these blocks into the existing robots.txt file. Keep current rules
unless a note calls out a conflicting Disallow.
```

```
# AI crawler access
# Add explicit Allow rules for blocked AI crawlers; remove or narrow
conflicting Disallow rules if your crawler target requires precedence.

Content-Signal

TXT

Content-Signal recommendations

Use these directives to make AI-use preferences explicit for compliant crawlers and AI systems. They are advisory signals, so keep them aligned with robots.txt, terms, and access controls.

Recommended values

- ai-train=no: AI model training, fine-tuning, and dataset creation.
- search=yes: AI search indexing, snippets, and discovery.
- ai-input=yes: AI answer grounding, retrieval, and generated-response context.

HTTP response header

```
'''http
Content-Signal: ai-train=no, search=yes, ai-input=yes
Content-Usage: train-ai=n
'''
```

Best for site-wide or route-specific policies because the signal travels with every response, including pages that AI systems fetch directly.

HTML meta tag alternatives

Add these inside the document '`<head>`' when server headers are not
