Needs Work

Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include AI guidance file and sitemap, while homepage access and crawler policy need attention. Recommended next step: remove AI crawler Disallow: / rules or replace them with narrower path-level restrictions for private content only.

Recommended next step

- 1. Remove AI crawler Disallow: / rules or replace them with narrower path-level restrictions for private content only.
- 2. Remove the GPTBot Disallow: / rule or add narrower Allow/Disallow rules if GPTBot should be able to discover public content.
- 3. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Signal breakdown

|                                                                                                                                                       |      |       |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|------|-------|
| <p>Crawlability</p> <p>Remove AI crawler Disallow: / rules or replace them with narrower path-level restrictions for private content only.</p>        | Fail | 0/20  |
| <p>Robots.txt</p> <p>Remove the GPTBot Disallow: / rule or add narrower Allow/Disallow rules if GPTBot should be able to discover public content.</p> | Fail | 0/15  |
| <p>llms.txt</p> <p>The llms.txt file was found and includes the expected text, length, heading, and URL signals.</p>                                  | Pass | 15/15 |

|                                                                                                                                                                                               |      |        |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|--------|
| <b>Sitemap</b>                                                                                                                                                                                | Pass | 10/10  |
| The sitemap.xml file is valid and contains URL entries.                                                                                                                                       |      |        |
| <b>Markdown support</b>                                                                                                                                                                       | Fail | 0/15   |
| Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests. |      |        |
| <b>Semantic HTML</b>                                                                                                                                                                          | Warn | 7.1/10 |
| Shorten the meta description to 160 characters or fewer. Add missing semantic elements: article.                                                                                              |      |        |
| <b>Structured data</b>                                                                                                                                                                        | Pass | 10/10  |
| Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.                                                                                                   |      |        |
| <b>Content signals</b>                                                                                                                                                                        | Fail | 0/5    |
| Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.        |      |        |

## Suggested fixes
