

OVERALL SCORE

32 /100 Poor

Executive summary

This site is difficult for AI tools to read right now. The main areas needing attention are AI guidance file and plain-text page access. Recommended next step: publish an AI guidance file as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

Recommended next step

- 1. Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.
- 2. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
- 3. Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.

|                                                                                                                                                     |                   |
|-----------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <p>Crawlability</p> <p>Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.</p>                       | <p>Warn 10/20</p> |
| <p>Robots.txt</p> <p>Publish /robots.txt with explicit crawler rules and Sitemap references so search and AI crawlers can discover site policy.</p> | <p>Warn 15/15</p> |
| <p>llms.txt</p> <p>Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.</p>       | <p>Fail 0/15</p>  |

|                                                                                                                                                                                               |      |        |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|--------|
| <b>Sitemap</b>                                                                                                                                                                                | Fail | 0/10   |
| Publish a valid XML sitemap at /sitemap.xml and reference it from robots.txt so crawlers and AI systems can discover important URLs.                                                          |      |        |
| <b>Markdown support</b>                                                                                                                                                                       | Fail | 0/15   |
| Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests. |      |        |
| <b>Semantic HTML</b>                                                                                                                                                                          | Warn | 7.1/10 |
| Add a meta description between 50 and 160 characters. Add missing semantic elements: main, article, footer.                                                                                   |      |        |
| <b>Structured data</b>                                                                                                                                                                        | Fail | 0/10   |
| Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.                                                                  |      |        |
| <b>Content signals</b>                                                                                                                                                                        | Fail | 0/5    |
| Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.        |      |        |
