

OVERALL SCORE

99 /100

AI -Ready

Executive summary

This site is in strong shape for AI discovery and readability. Key strengths include homepage access and crawler policy, while page structure needs attention. Recommended next step: add missing semantic elements: main, article, nav, footer.

Recommended next step

- 1. Add missing semantic elements: main, article, nav, footer.

Signal breakdown

Crawlability The homepage resolves, connects, returns HTTP 200 OK, exposes a canonical URL, and is not blocked by robots.txt.	Pass	20/20
Robots.txt robots.txt allows crawler access and includes Sitemap references.	Pass	15/15
llms.txt The llms.txt file was found and includes the expected text, length, heading, and URL signals.	Pass	15/15
Sitemap The sitemap.xml file is valid and contains URL entries.	Pass	10/10
Markdown support The homepage returns markdown content when requested with Accept: text/markdown, giving AI systems a cleaner text representation with less navigation chrome to parse.	Pass	15/15

Semantic HTML	Warn	8.6/10
Add missing semantic elements: main, article, nav, footer.		

Structured data	Pass	10/10
Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.		

Content signals	Pass	5/5
Consider adding AI-specific head meta tags, robots noai/noimageai directive, Content-Signal robots.txt directive so AI systems can consistently discover content usage preferences across robots.txt, HTTP headers, and HTML metadata.		

Suggested fixes

llms.txt MARKDOWN # GetBrazilVisa: Brazil Digital Nomad Visa Specialists 2026 > Brazil’s dedicated digital nomad visa service. OAB-licensed lawyer reviews every application. 95% approval, 28-day processing, from \$299. This llms.txt file summarizes the public, canonical resources that AI assistants and crawlers should use to understand this site. ## Site Overview - Canonical URL: https://getbrazilvisa.com/ - Site type: organization - Recommended summary: Brazil’s dedicated digital nomad visa service. OAB-licensed lawyer reviews every application. 95% approval, 28-day processing, from \$299. ## Core URLs - [Homepage](https://getbrazilvisa.com/): Primary public entry point and canonical site overview. ## Content Recommendations - Add one-sentence descriptions for product, service, documentation, pricing, support, blog, and policy pages that should be easy for AI systems to summarize. robots.txt additions

TXT

```
# robots.txt additions
# Copy these blocks into the existing robots.txt file. Keep current rules
unless a note calls out a conflicting Disallow.

# Crawl-rate guidance
# Add Crawl-delay under a User-agent block when the site needs gentler
crawler pacing.
User-agent: *
Crawl-delay: 10

Content-Signal

TXT

Content-Signal recommendations

Use these directives to make AI-use preferences explicit for compliant crawlers and AI systems. They are advisory signals, so keep them aligned with robots.txt, terms, and access controls.

Recommended values

- ai-train=no: AI model training, fine-tuning, and dataset creation.
- search=yes: AI search indexing, snippets, and discovery.
- ai-input=yes: AI answer grounding, retrieval, and generated-response context.

HTTP response header

```
'''http
Content-Signal: ai-train=no, search=yes, ai-input=yes
Content-Usage: train-ai=n
'''
```

Best for site-wide or route-specific policies because the signal travels with every response, including pages that AI systems fetch directly.

HTML meta tag alternatives

Add these inside the document '`<head>`' when server headers are not
