Needs Work

## Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include homepage access and crawler policy, while plain-text page access and content signals need attention. Recommended next step: make the homepage respond successfully to requests with `Accept: text/markdown`, either by serving markdown directly or by adding a markdown variant URL with correct content negotiation.

## Recommended next step

1. Make the homepage respond successfully to requests with `Accept: text/markdown`, either by serving markdown directly or by adding a markdown variant URL with correct content negotiation.
2. Publish `/llms.txt` as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.
3. Prefer valid JSON-LD and include `Organization` or `WebSite schema.org` types in valid JSON-LD for clearer AI interpretation.

## Signal breakdown

### Crawlability

Pass 20/20

The homepage resolves, connects, returns HTTP 200 OK, exposes a canonical URL, and is not blocked by robots.txt.

### Robots.txt

Pass 15/15

robots.txt allows crawler access and includes Sitemap references.

### llms.txt

Warn 7.5/15

Publish `/llms.txt` as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

## Sitemap

Pass 10/10

The sitemap.xml file is valid and contains URL entries.

## Markdown support

Fail 0/15

Make the homepage respond successfully to requests with Accept: text/markdown, either by serving markdown directly or by adding a markdown variant URL with correct content negotiation.

## Semantic HTML

Warn 7.1/10

Add missing semantic elements: article, nav, footer. Add visible body copy after script and style removal so the page has at least 200 words.

## Structured data

Warn 5/10

Prefer valid JSON-LD and include Organization or WebSite schema.org types in valid JSON-LD for clearer AI interpretation.

## Content signals

Fail 0/5

Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

## Suggested fixes

### Fix Structured data

#### HTML

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@graph": [
    {
      "@type": "Organization",
      "@id": "https://commit-history.com/#organization",
      "name": "Commit History - a star-history for a GitHub user's lifetime
commits",
      "description": "Visualize any GitHub user's cumulative commits over their
entire lifetime as a chart. Like star-history.com, but for commits.",
      "url": "https://commit-history.com/",
      "logo": "https://commit-history.com/crown-180.png",
      "sameAs": [
        "https://github.com/peetzweg/commit-history",
        "https://github.com/peetzweg"
      ]
    },
    {
      "@type": "WebSite",
      "@id": "https://commit-history.com/#website",
      "name": "Commit History - a star-history for a GitHub user's lifetime
commits",
      "description": "Visualize any GitHub user's cumulative commits over their
entire lifetime as a chart. Like star-history.com, but for commits.",
      "url": "https://commit-history.com/",
      "Continued in the full scan report..."
    }
  ]
}
```

### Fix Content signals

#### HTML

```
<meta http-equiv="Content-Signal" content="ai-train=no, search=yes,
ai-input=yes" />
<meta name="content-signal" content="ai-train=no, search=yes, ai-input=yes"
/>
```
