Needs Work

Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include homepage access and crawler policy, while AI guidance file and plain-text page access need attention. Recommended next step: publish an AI guidance file as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

Recommended next step

- 1. Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.
- 2. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
- 3. Shorten the meta description to 160 characters or fewer. Add exactly one h1 element that describes the page topic. Add missing semantic elements: main, article, nav, footer. Add visible body copy after script and style removal so the page has at least 200 words.

Signal breakdown

Crawlability Pass 20/20

The homepage resolves, connects, returns HTTP 200 OK, exposes a canonical URL, and is not blocked by robots.txt.

Robots.txt Pass 15/15

robots.txt allows crawler access and includes Sitemap references.

llms.txt Fail 0/15

Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

Sitemap	Pass	10/10
The sitemap.xml file is valid and contains URL entries.		
Markdown support	Fail	0/15
Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.		
Semantic HTML	Fail	0/10
Shorten the meta description to 160 characters or fewer. Add exactly one h1 element that describes the page topic. Add missing semantic elements: main, article, nav, footer. Add visible body copy after script and style removal so the		
Structured data	Fail	0/10
Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.		
Content signals	Fail	0/5
Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.		

Suggested fixes

Fix Structured data

HTML

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@graph": [
    {
      "@type": "Organization",
      "@id": "https://otium-library.com/#organization",
      "name": "Otium - your time to read",
      "description": "Otium is a calm, beautiful book tracker: log what you read,
      build reading streaks, set yearly goals, organise shelves and collections,
      and look back on your year in books.",
      "url": "https://otium-library.com/",
      "logo": "https://otium-library.com/apple-touch-icon.png"
    },
    {
      "@type": "WebSite",
      "@id": "https://otium-library.com/#website",
      "name": "Otium - your time to read",
      "description": "Otium is a calm, beautiful book tracker: log what you read,
      build reading streaks, set yearly goals, organise shelves and collections,
      and look back on your year in books.",
      "url": "https://otium-library.com/",
      "publisher": {
        "@id": "https://otium-library.com/#organization"
      }
    },
    {
      "@type": "Text",
      "text": "Continued in the full scan report..."
    }
  ]
}
```

Fix Content signals

HTML

```
<meta http-equiv="Content-Signal" content="ai-train=no, search=yes,
ai-input=yes" />
<meta name="content-signal" content="ai-train=no, search=yes, ai-input=yes"
/>
```
