PUBLIC AI VISIBILITY REPORT

myresumeguru.vercel.app

Scanned Jul 1, 2026, 11:01 UTC

OVERALL SCORE

25 /100

Poor

Executive summary

This site is difficult for AI tools to read right now. The main areas needing attention are AI guidance file and plain-text page access. Recommended next step: publish an AI guidance file as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

Recommended next step

1. Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.
2. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
3. Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.

Signal breakdown

Crawlability

Warn 10/20

Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.

Robots.txt

Warn 15/15

Publish /robots.txt with explicit crawler rules and Sitemap references so search and AI crawlers can discover site policy.

llms.txt

Fail 0/15

Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

Sitemap

Fail 0/10

Publish a valid XML sitemap at /sitemap.xml and reference it from robots.txt so crawlers and AI systems can discover important URLs.

Markdown support

Fail 0/15

Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Semantic HTML

Fail 0/10

Expand the meta description to at least 50 characters. Use exactly one h1 element and move secondary section titles to h2-h6. Avoid skipped heading levels so sections progress from h1 to h2 to h3 without gaps. Add missing semantic elements:

Structured data

Fail 0/10

Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.

Content signals

Fail 0/5

Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

Suggested fixes

Fix Structured data

HTML

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@graph": [
    {
      "@type": "Organization",
      "@id": "https://myresumeguru.vercel.app/#organization",
      "name": "myresume.guru",
      "description": "Land your dream job with myresume.guru",
      "url": "https://myresumeguru.vercel.app/",
      "logo": "https://myresumeguru.vercel.app/favicon.ico"
    },
    {
      "@type": "WebSite",
      "@id": "https://myresumeguru.vercel.app/#website",
      "name": "myresume.guru",
      "description": "Land your dream job with myresume.guru",
      "url": "https://myresumeguru.vercel.app/",
      "publisher": {
        "@id": "https://myresumeguru.vercel.app/#organization"
      },
      "inLanguage": "en"
    }
  ]
}
</script>
```

Fix Content signals

HTML

```
<meta http-equiv="Content-Signal" content="ai-train=no, search=yes,
ai-input=yes" />
<meta name="content-signal" content="ai-train=no, search=yes, ai-input=yes"
/>
```
