Needs Work

Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include crawler policy and AI guidance file, while sitemap and content signals need attention. Recommended next step: publish a valid XML sitemap at /sitemap.xml and reference it from the crawler policy file so crawlers and AI systems can discover important URLs.

Recommended next step

- 1. Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.
- 2. Publish a valid XML sitemap at /sitemap.xml and reference it from robots.txt so crawlers and AI systems can discover important URLs.
- 3. Prefer valid JSON-LD and include Organization or WebSite schema.org types in valid JSON-LD for clearer AI interpretation.

Signal breakdown
