

OVERALL SCORE

83 /100

AI-Readable

Executive summary

This site is mostly readable by AI tools, with a few improvements still recommended. Key strengths include AI guidance file and plain-text page access, while homepage access and crawler policy need attention. Recommended next step: review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.

Recommended next step

- 1. Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.
- 2. Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access.

Signal breakdown

Crawlability Warn 10/20

Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.

Robots.txt Warn 7.5/15

Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access.

llms.txt Pass 15/15

The llms.txt file was found and includes the expected text, length, heading, and URL signals.

Sitemap Pass 10/10

The sitemap.xml file is valid and contains URL entries.

Markdown support	Pass	15/15
The homepage returns markdown content when requested with Accept: text/markdown, giving AI systems a cleaner text representation with less navigation chrome to parse.		
Semantic HTML	Pass	10/10
The homepage has a valid title, meta description, heading structure, semantic landmarks, substantial body copy, and descriptive anchor text.		
Structured data	Pass	10/10
Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.		
Content signals	Pass	5/5
Consider adding AI-specific head meta tags, robots noai/noimageai directive, Content-Signal robots.txt directive so AI systems can consistently discover content usage preferences across robots.txt, HTTP headers, and HTML metadata.		
Suggested fixes		

llms.txt
MARKDOWN
iZi Reparto - Envios urbanos con foto, PIN y QR Uruguay
> Envios urbanos para comercios y riders en Maldonado y Punta del Este. Pago online, custodia foto+PIN+QR, tracking en vivo. Open beta 2026.
This llms.txt file summarizes the public, canonical resources that AI assistants and crawlers should use to understand this site.
Site Overview
- Canonical URL: https://izireparto.com/
- Site type: organization
- Recommended summary: Envios urbanos para comercios y riders en Maldonado y Punta del Este. Pago online, custodia foto+PIN+QR, tracking en vivo. Open beta 2026.
Core URLs
- [Homepage](https://izireparto.com/): Primary public entry point and canonical site overview.
- [Como funciona](https://izireparto.com/como-funciona): Important public page discovered from the homepage navigation.
- [Para comercios](https://izireparto.com/para-comercios): Important public page discovered from the homepage navigation.
- [Riders](https://izireparto.com/para-riders): Important public page discovered from the homepage navigation.

robots.txt additions

TXT

```
# robots.txt additions
# Copy these blocks into the existing robots.txt file. Keep current rules
unless a note calls out a conflicting Disallow.

# AI crawler access
# Add explicit Allow rules for blocked AI crawlers; remove or narrow
conflicting Disallow rules if your crawler target requires precedence.

Content-Signal

TXT

Content-Signal recommendations

Use these directives to make AI-use preferences explicit for compliant crawlers and AI systems. They are advisory signals, so keep them aligned with robots.txt, terms, and access controls.

Recommended values

- ai-train=no: AI model training, fine-tuning, and dataset creation.
- search=yes: AI search indexing, snippets, and discovery.
- ai-input=yes: AI answer grounding, retrieval, and generated-response context.

HTTP response header

```
'''http
Content-Signal: ai-train=no, search=yes, ai-input=yes
Content-Usage: train-ai=n
'''
```

Best for site-wide or route-specific policies because the signal travels with every response, including pages that AI systems fetch directly.

HTML meta tag alternatives

Add these inside the document '`<head>`' when server headers are not
