Needs Work

## Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include AI guidance file and sitemap, while plain-text page access and page structure need attention. Recommended next step: add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

## Recommended next step

1. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
2. Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.
3. Add a meta description between 50 and 160 characters. Use exactly one h1 element and move secondary section titles to h2-h6. Add missing semantic elements: main, article, nav, footer. Add visible body copy after script and style removal so the page has at least 200 words.

## Signal breakdown

CrawlabilityWarn10/20

Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.

Robots.txtWarn7.5/15

Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access.

| <b>Structured data</b>                                                                                                                                                                                                                              | Warn | 5/10  |
| Prefer valid JSON-LD and include Organization or WebSite schema.org types in valid JSON-LD for clearer AI interpretation.                                                                                                                           |      |       |
| <b>Content signals</b>                                                                                                                                                                                                                              | Fail | 0/5   |
| Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.                                                              |      |       |

# Suggested fixes

## Fix Structured data

HTML

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@graph": [
    {
      "@type": "Organization",
      "@id": "https://whop.com/joined/asset-manager-sgx7/#organization",
      "name": "Asset Manager-sgx7 | Whop",
      "description": "Website for Asset Manager-sgx7 | Whop.",
      "url": "https://whop.com/joined/asset-manager-sgx7/",
      "logo": "https://whop.com/apple-icon.png?apple-icon.10__au7c.kr_4.png"
    },
    {
      "@type": "WebSite",
