Needs Work

## Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include homepage access and crawler policy, while plain-text page access and structured data need attention. Recommended next step: add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

## Recommended next step

1. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
2. Fix JSON syntax errors in application/ld+json script tags and include Organization or WebSite schema.
3. Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

## Signal breakdown

### Crawlability

Pass 20/20

The homepage resolves, connects, returns HTTP 200 OK, exposes a canonical URL, and is not blocked by robots.txt.

### Robots.txt

Pass 15/15

robots.txt allows crawler access and includes Sitemap references.

### llms.txt

Pass 15/15

The llms.txt file was found and includes the expected text, length, heading, and URL signals.

## Sitemap

Pass 10/10

The sitemap.xml file is valid and contains URL entries.

## Markdown support

Fail 0/15

Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

## Semantic HTML

Warn 8.6/10

Add missing semantic elements: main, article, nav, footer.

## Structured data

Fail 0/10

Fix JSON syntax errors in application/ld+json script tags and include Organization or WebSite schema.

## Content signals

Fail 0/5

Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

## Suggested fixes

### Fix Structured data

#### HTML

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@graph": [
    {
      "@type": "Organization",
      "@id": "https://www.seouloupe.com/#organization",
      "name": "SeoLoupe - SEO, GEO & AEO Audit Tool That Shows You What to Fix",
      "description": "Run a full SEO, GEO & AEO audit in minutes. SeoLoupe scans your site, flags what's hurting rankings and AI visibility, and shows exactly what to fix.",
      "url": "https://www.seouloupe.com/",
      "logo": "https://assets.codepen.io/9358497/icon2.png",
      "sameAs": [
        "https://x.com/seouloupe",
        "https://www.instagram.com/seouloupe/"
      ]
    },
    {
      "@type": "WebSite",
      "@id": "https://www.seouloupe.com/#website",
      "name": "SeoLoupe - SEO, GEO & AEO Audit Tool That Shows You What to Fix",
      "description": "Run a full SEO, GEO & AEO audit in minutes. SeoLoupe scans your site, flags what's hurting rankings and AI visibility, and shows exactly what to fix.",
      "url": "https://www.seouloupe.com/"
    }
  ]
}
```

### Fix Content signals

#### HTML

```
<meta http-equiv="Content-Signal" content="ai-train=no, search=yes, ai-input=yes" />
<meta name="content-signal" content="ai-train=no, search=yes, ai-input=yes" />
```
