Needs Work

Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include structured data, while AI guidance file and plain-text page access need attention. Recommended next step: publish an AI guidance file as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

Recommended next step

- 1. Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.
- 2. Make the homepage respond successfully to requests with Accept: text/markdown, either by serving markdown directly or by adding a markdown variant URL with correct content negotiation.
- 3. Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.

Signal breakdown

|                                                                                                                                                     |                          |
|-----------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
| <p>Crawlability</p> <p>Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.</p>                       | <p>Warn</p> <p>10/20</p> |
| <p>Robots.txt</p> <p>Publish /robots.txt with explicit crawler rules and Sitemap references so search and AI crawlers can discover site policy.</p> | <p>Warn</p> <p>15/15</p> |
| <p>llms.txt</p> <p>Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.</p>       | <p>Fail</p> <p>0/15</p>  |

|                                                                                                                                                                                          |      |        |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|--------|
| <b>Sitemap</b>                                                                                                                                                                           | Fail | 0/10   |
| Publish a valid XML sitemap at /sitemap.xml and reference it from robots.txt so crawlers and AI systems can discover important URLs.                                                     |      |        |
| <b>Markdown support</b>                                                                                                                                                                  | Fail | 0/15   |
| Make the homepage respond successfully to requests with Accept: text/markdown, either by serving markdown directly or by adding a markdown variant URL with correct content negotiation. |      |        |
| <b>Semantic HTML</b>                                                                                                                                                                     | Warn | 8.6/10 |
| Add missing semantic elements: article.                                                                                                                                                  |      |        |
| <b>Structured data</b>                                                                                                                                                                   | Pass | 10/10  |
| Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.                                                                                              |      |        |
| <b>Content signals</b>                                                                                                                                                                   | Fail | 0/5    |
| Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.   |      |        |
