

OVERALL SCORE

32 /100 Poor

Executive summary

This site is difficult for AI tools to read right now. Key strengths include crawler policy, while AI guidance file and plain-text page access need attention. Recommended next step: publish an AI guidance file as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

Recommended next step

- 1. Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.
- 2. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
- 3. Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.

Signal breakdown

Crawlability	Warn	10/20
Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.		
Robots.txt	Pass	15/15
Add Sitemap directives to robots.txt so crawlers can find canonical sitemap files.		
llms.txt	Fail	0/15
Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.		

Sitemap	Fail	0/10
Publish a valid XML sitemap at /sitemap.xml and reference it from robots.txt so crawlers and AI systems can discover important URLs.		
Markdown support	Fail	0/15
Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.		
Semantic HTML	Warn	7.1/10
Add missing semantic elements: article, nav. Add visible body copy after script and style removal so the page has at least 200 words.		
Structured data	Fail	0/10
Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.		
Content signals	Fail	0/5
Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.		

Suggested fixes

Fix Structured data

HTML

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@graph": [
    {
      "@type": "Organization",
      "@id": "https://ipaidfornothing.com/#organization",
      "name": "Give me $1. I do nothing in return.",
      "description": "Give me exactly $1. In return, I promise to do absolutely nothing. Join the legends who paid for literally nothing.",
      "url": "https://ipaidfornothing.com/",
      "sameAs": [
        "https://twitter.com/intent/tweet?text=I%20just%20gave%20%241%20for%20absolutely%20nothing.%20Best%20deal%20online.%20%F0%9F%91%87&url=https%3A%2F%2Fipaidfornothing.com"
      ]
    },
    {
      "@type": "WebSite",
      "@id": "https://ipaidfornothing.com/#website",
      "name": "Give me $1. I do nothing in return.",
      "description": "Give me exactly $1. In return, I promise to do absolutely nothing. Join the legends who paid for literally nothing.",
      "url": "https://ipaidfornothing.com/",
      "publisher": {
        "@id": "https://ipaidfornothing.com/#organization"
      }
    }
  ]
}
```

Fix Content signals

HTML

```
<meta http-equiv="Content-Signal" content="ai-train=no, search=yes, ai-input=yes" />
<meta name="content-signal" content="ai-train=no, search=yes, ai-input=yes" />
```
