Needs Work

Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include AI guidance file and sitemap, while plain-text page access and content signals need attention. Recommended next step: add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Recommended next step

1. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
2. Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.
3. Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access.

Signal breakdown

Crawlability

Warn10/20

Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.

Robots.txt

Warn7.5/15

Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access.

llms.txt

Pass15/15

The llms.txt file was found and includes the expected text, length, heading, and URL signals.

|                                                                                                                                                                                                                           |      |        |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|--------|
| <b>Sitemap</b>                                                                                                                                                                                                            | Pass | 10/10  |
| The sitemap.xml file is valid and contains URL entries.                                                                                                                                                                   |      |        |
| <b>Markdown support</b>                                                                                                                                                                                                   | Fail | 0/15   |
| Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.                             |      |        |
| <b>Semantic HTML</b>                                                                                                                                                                                                      | Warn | 5.7/10 |
| Avoid skipped heading levels so sections progress from h1 to h2 to h3 without gaps. Add missing semantic elements: article, nav. Add visible body copy after script and style removal so the page has at least 200 words. |      |        |
| <b>Structured data</b>                                                                                                                                                                                                    | Pass | 10/10  |
| Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.                                                                                                                               |      |        |
| <b>Content signals</b>                                                                                                                                                                                                    | Fail | 0/5    |
| Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.                                    |      |        |

## Suggested fixes

|                                                                                                                                                                                            |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Fix Content signals</b>                                                                                                                                                                 |
| <b>HTML</b>                                                                                                                                                                                |
