Needs Work

## Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include crawler policy and AI guidance file, while plain-text page access and content signals need attention. Recommended next step: add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

## Recommended next step

1. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
2. Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.
3. Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

## Signal breakdown

### Crawlability

Warn 10/20

Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.

### Robots.txt

Pass 15/15

robots.txt allows crawler access and includes Sitemap references.

### llms.txt

Pass 15/15

The llms.txt file was found and includes the expected text, length, heading, and URL signals.

## Sitemap

Pass 10/10

The sitemap index is valid and the checked child sitemap contains URL entries.

## Markdown support

Fail 0/15

Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

## Semantic HTML

Warn 8.6/10

Add missing semantic elements: nav, footer.

## Structured data

Pass 10/10

Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.

## Content signals

Fail 0/5

Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

## Suggested fixes

### Fix Content signals

#### HTML

```
<meta http-equiv="Content-Signal" content="ai-train=no, search=yes,
ai-input=yes" />
<meta name="content-signal" content="ai-train=no, search=yes, ai-input=yes"
/>
```
