Needs Work

### Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include homepage access and crawler policy, while plain-text page access and structured data need attention. Recommended next step: add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

### Recommended next step

1. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
2. Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.
3. Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

|-------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------|
| <div>Crawlability</div> <div>The homepage resolves, connects, returns HTTP 200 OK, exposes a canonical URL, and is not blocked by robots.txt.</div>   | <div>Pass</div> <div>20/20</div>  |
| <div>Robots.txt</div> <div>robots.txt allows crawler access and includes Sitemap references.</div>                                                    | <div>Pass</div> <div>15/15</div>  |
| <div>llms.txt</div> <div>Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.</div> | <div>Warn</div> <div>7.5/15</div> |

|                                                                                                                                                                                                               |      |        |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|--------|
| <b>Sitemap</b>                                                                                                                                                                                                | Pass | 10/10  |
| The sitemap.xml file is valid and contains URL entries.                                                                                                                                                       |      |        |
| <b>Markdown support</b>                                                                                                                                                                                       | Fail | 0/15   |
| Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.                 |      |        |
| <b>Semantic HTML</b>                                                                                                                                                                                          | Warn | 5.7/10 |
| Add exactly one h1 element that describes the page topic. Add missing semantic elements: main, article, nav, footer. Add visible body copy after script and style removal so the page has at least 200 words. |      |        |
| <b>Structured data</b>                                                                                                                                                                                        | Fail | 0/10   |
| Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.                                                                                  |      |        |
| <b>Content signals</b>                                                                                                                                                                                        | Fail | 0/5    |
| Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.                        |      |        |

# Suggested fixes

## Fix Structured data

HTML

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@graph": [
    {
      "@type": "Organization",
      "@id": "https://coviohome.com/#organization",
      "name": "Covio - The Personal Command Center for Your Home",
      "description": "Covio helps homeowners stay on top of maintenance, warranties, improvement projects, and seasonal tasks - all in one mobile-first command center for your home.",
      "url": "https://coviohome.com/",
      "logo": "https://coviohome.com/apple-touch-icon.png"
    },
    {
      "@type": "WebSite",
      "@id": "https://coviohome.com/#website",
      "name": "Covio - The Personal Command Center for Your Home",
      "description": "Covio helps homeowners stay on top of maintenance, warranties, improvement projects, and seasonal tasks - all in one mobile-first command center for your home.",
      "url": "https://coviohome.com/",
      "publisher": {
        "@id": "https://coviohome.com/#organization"
      }
    },
    {
      "@type": "Text",
      "text": "Continued in the full scan report..."
    }
  ]
}
```

## Fix Content signals

HTML

```
<meta http-equiv="Content-Signal" content="ai-train=no, search=yes, ai-input=yes" />
<meta name="content-signal" content="ai-train=no, search=yes, ai-input=yes" />
```
