Needs Work

## Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include sitemap, while plain-text page access and structured data need attention. Recommended next step: add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

## Recommended next step

1. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
2. Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.
3. Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.

## Signal breakdown

### Crawlability

Warn 10/20

Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.

### Robots.txt

Warn 7.5/15

Fix robots.txt syntax issues so each rule uses Field: value format, directives appear under a User-agent, and Sitemap entries use absolute URLs.

### llms.txt

Warn 7.5/15

Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

## Sitemap

Pass 10/10

The sitemap.xml file is valid and contains URL entries.

## Markdown support

Fail 0/15

Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

## Semantic HTML

Warn 5.7/10

Avoid skipped heading levels so sections progress from h1 to h2 to h3 without gaps. Add missing semantic elements: article. Add visible body copy after script and style removal so the page has at least 200 words.

## Structured data

Fail 0/10

Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.

## Content signals

Fail 0/5

Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

## Suggested fixes

### Fix Structured data

#### HTML

```
<script type="application/ld+json">
{
"@context": "https://schema.org",
"@graph": [
{
"@type": "Organization",
"@id": "https://prmpmts.app/#organization",
"name": "prmpmts - Save, Organize & Share AI Prompts",
"description": "Save, organize and share the prompts that make your AI work better. Write one now - no sign-up, no friction. Get a shareable short link in seconds.",
"url": "https://prmpmts.app/",
"logo": "https://prmpmts.app/icon.svg?f1e6201abc4d0fbc",
"sameAs": [
"https://www.facebook.com/profile.php?id=61591360531855",
"https://www.instagram.com/promptsapp/",
"https://x.com/PromptsApph"
]
},
{
"@type": "WebSite",
"@id": "https://prmpmts.app/#website",
"name": "prmpmts - Save, Organize & Share AI Prompts",
"description": "Save, organize and share the prompts that make your AI work better. Write one now - no sign-up, no friction. Get a shareable short link in seconds."
}
]
}
</script>
```

### Fix Content signals

#### HTML

```
<meta http-equiv="Content-Signal" content="ai-train=no, search=yes, ai-input=yes" />
<meta name="content-signal" content="ai-train=no, search=yes, ai-input=yes" />
```
