66 /100

Needs Work

Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include AI guidance file and sitemap, while plain-text page access and homepage access need attention. Recommended next step: add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Recommended next step

1. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
2. Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.
3. Fix robots.txt syntax issues so each rule uses Field: value format, directives appear under a User-agent, and Sitemap entries use absolute URLs.

Signal breakdown

Crawlability

Warn 10/20

Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.

Robots.txt

Warn 7.5/15

Fix robots.txt syntax issues so each rule uses Field: value format, directives appear under a User-agent, and Sitemap entries use absolute URLs.

llms.txt

Pass 15/15

The llms.txt file was found and includes the expected text, length, heading, and URL signals.

Sitemap

Pass 10/10

The sitemap.xml file is valid and contains URL entries.

Markdown support

Fail 0/15

Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Semantic HTML

Warn 8.6/10

Add missing semantic elements: article.

Structured data

Pass 10/10

Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.

Content signals

Pass 5/5

Consider adding AI-specific head meta tags, robots noai/noimageai directive, Content-Signal robots.txt directive so AI systems can consistently discover content usage preferences across robots.txt, HTTP headers, and HTML metadata.

Suggested fixes

llms.txt

MARKDOWN

Aluguel de Cacamba com CNPJ Verificado | Cacamba Certa

> Compare 2.566 empresas de aluguel de cacamba em 9 cidades, sendo 1.466 com CNPJ ativo verificado na Receita Federal. Avaliaco es reais e WhatsApp.

This llms.txt file summarizes the public, canonical resources that AI assistants and crawlers should use to understand this site.

Site Overview

- Canonical URL: <https://cacambacerta.com.br/>
- Site type: organization
- Recommended summary: Compare 2.566 empresas de aluguel de cacamba em 9 cidades, sendo 1.466 com CNPJ ativo verificado na Receita Federal. Avaliaco es reais e WhatsApp.

Core URLs

- [Homepage](<https://cacambacerta.com.br/>): Primary public entry point and canonical site overview.
- [Cidades](<https://cacambacerta.com.br/cidade>): Important public page discovered from the homepage navigation.
- [Precos](<https://cacambacerta.com.br/preco>): Important public page discovered from the homepage navigation.
- [Tamanhos](<https://cacambacerta.com.br/tamanho>): Important public page discovered from the homepage navigation. Continued in the full scan report...

robots.txt additions

TXT

```
# robots.txt additions
# Copy these blocks into the existing robots.txt file. Keep current rules
unless a note calls out a conflicting Disallow.

# AI crawler access
# Add explicit Allow rules for blocked AI crawlers; remove or narrow
conflicting Disallow rules if your crawler target requires precedence.

Content-Signal

TXT

Content-Signal recommendations

Use these directives to make AI-use preferences explicit for compliant crawlers and AI systems. They are advisory signals, so keep them aligned with robots.txt, terms, and access controls.

Recommended values

- ai-train=no: AI model training, fine-tuning, and dataset creation.
- search=yes: AI search indexing, snippets, and discovery.
- ai-input=yes: AI answer grounding, retrieval, and generated-response context.

HTTP response header

```
``http
Content-Signal: ai-train=no, search=yes, ai-input=yes
Content-Usage: train-ai=n
````
```

Best for site-wide or route-specific policies because the signal travels with every response, including pages that AI systems fetch directly.

## HTML meta tag alternatives

Add these inside the document '<head>' when server headers are not
