

OVERALL SCORE

33 /100

Poor

Executive summary

This site is difficult for AI tools to read right now. Key strengths include sitemap, while AI guidance file and plain-text page access need attention. Recommended next step: publish an AI guidance file as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

Recommended next step

1. Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.
2. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
3. Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.

|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|--------|
| <b>Sitemap</b>                                                                                                                                                                                      | Pass | 10/10  |
| The sitemap.xml file is valid and contains URL entries.                                                                                                                                             |      |        |
| <b>Markdown support</b>                                                                                                                                                                             | Fail | 0/15   |
| Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.       |      |        |
| <b>Semantic HTML</b>                                                                                                                                                                                | Warn | 5.7/10 |
| Shorten the title tag to 70 characters or fewer. Add missing semantic elements: main, article. Replace generic anchor text so fewer than 10% of links use labels like "click here" or "learn more". |      |        |
| <b>Structured data</b>                                                                                                                                                                              | Fail | 0/10   |
| Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.                                                                        |      |        |
| <b>Content signals</b>                                                                                                                                                                              | Fail | 0/5    |
| Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.              |      |        |
