Needs Work

## Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include sitemap, while AI guidance file and plain-text page access need attention. Recommended next step: publish an AI guidance file as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

## Recommended next step

1. Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.
2. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
3. Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.

## Signal breakdown

### Crawlability

Warn 10/20

Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.

### Robots.txt

Warn 7.5/15

Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access.

### llms.txt

Fail 0/15

Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

## Sitemap

Pass 10/10

The sitemap.xml file is valid and contains URL entries.

## Markdown support

Fail 0/15

Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

## Semantic HTML

Warn 7.1/10

Shorten the meta description to 160 characters or fewer. Add missing semantic elements: main, article.

## Structured data

Warn 5/10

Prefer valid JSON-LD and include Organization or WebSite schema.org types in valid JSON-LD for clearer AI interpretation.

## Content signals

Fail 0/5

Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

## Suggested fixes

### Fix Structured data

#### HTML

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@graph": [
    {
      "@type": "Organization",
      "@id": "https://recapp.dev/#organization",
      "name": "Rec | AI Screen Recording That Costs $0.02 per View, Not $24 per Seat",
      "description": "Rec turns every screen recording into a transcript, a summary, and searchable knowledge. Claude, Cursor, and any AI connect over MCP and can record demos for you. $0.02 per viewed minute, no watermarks, no time limits.",
      "url": "https://recapp.dev/",
      "logo": "https://recapp.dev/Recapp-favicon192.svg"
    },
    {
      "@type": "WebSite",
      "@id": "https://recapp.dev/#website",
      "name": "Rec | AI Screen Recording That Costs $0.02 per View, Not $24 per Seat",
      "description": "Rec turns every screen recording into a transcript, a summary, and searchable knowledge. Claude, Cursor, and any AI connect over MCP and can record demos for you. $0.02 per viewed minute, no watermarks, no time limits.",
      "url": "https://recapp.dev/"
    }
  ]
}
```
