Needs Work

Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include homepage access and crawler policy, while plain-text page access and structured data need attention. Recommended next step: make the homepage respond successfully to requests with Accept: text/markdown, either by serving markdown directly or by adding a markdown variant URL with correct content negotiation.

Recommended next step

- 1. Make the homepage respond successfully to requests with Accept: text/markdown, either by serving markdown directly or by adding a markdown variant URL with correct content negotiation.
- 2. Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.
- 3. Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

Signal breakdown

Crawlability Pass 20/20

The homepage resolves, connects, returns HTTP 200 OK, exposes a canonical URL, and is not blocked by robots.txt.

Robots.txt Pass 15/15

robots.txt allows crawler access and includes Sitemap references.

llms.txt Pass 15/15

The llms.txt file was found and includes the expected text, length, heading, and URL signals.

Sitemap	Pass	10/10
The sitemap.xml file is valid and contains URL entries.		
Markdown support	Fail	0/15
Make the homepage respond successfully to requests with Accept: text/markdown, either by serving markdown directly or by adding a markdown variant URL with correct content negotiation.		
Semantic HTML	Warn	5.7/10
Add exactly one h1 element that describes the page topic. Add missing semantic elements: main, article, nav, footer. Add visible body copy after script and style removal so the page has at least 200 words.		
Structured data	Fail	0/10
Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.		
Content signals	Fail	0/5
Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.		

Suggested fixes

Fix Structured data

HTML

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@graph": [
    {
      "@type": "Organization",
      "@id": "https://pixelpainters.com/#organization",
      "name": "Unlimited Graphic Design for Churches | PixelPainters",
      "description": "Unlimited church graphics with fast 2-3 day turnaround,
unlimited revisions, and simple monthly pricing starting at $490/mo.
Risk-free 14-day guarantee.",
      "url": "https://pixelpainters.com/",
      "logo": "https://pixelpainters.com/favicon.gif"
    },
    {
      "@type": "WebSite",
      "@id": "https://pixelpainters.com/#website",
      "name": "Unlimited Graphic Design for Churches | PixelPainters",
      "description": "Unlimited church graphics with fast 2-3 day turnaround,
unlimited revisions, and simple monthly pricing starting at $490/mo.
Risk-free 14-day guarantee.",
      "url": "https://pixelpainters.com/",
      "publisher": {
        "@id": "https://pixelpainters.com/#organization"
      }
    },
    {
      "@type": "Text",
      "text": "Continued in the full scan report..."
    }
  ]
}
```

Fix Content signals

HTML

```
<meta http-equiv="Content-Signal" content="ai-train=no, search=yes,
ai-input=yes" />
<meta name="content-signal" content="ai-train=no, search=yes, ai-input=yes"
/>
```
