

OVERALL SCORE

81 /100

AI-Readable

Executive summary

This site is mostly readable by AI tools, with a few improvements still recommended. Key strengths include homepage access and AI guidance file, while structured data and crawler policy need attention. Recommended next step: add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.

Recommended next step

- 1. Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.
- 2. Fix robots.txt syntax issues so each rule uses Field: value format, directives appear under a User-agent, and Sitemap entries use absolute URLs.
- 3. Add missing semantic elements: article.

Signal breakdown

Crawlability Pass 20/20

The homepage resolves, connects, returns HTTP 200 OK, exposes a canonical URL, and is not blocked by robots.txt.

Robots.txt Warn 7.5/15

Fix robots.txt syntax issues so each rule uses Field: value format, directives appear under a User-agent, and Sitemap entries use absolute URLs.

llms.txt Pass 15/15

The llms.txt file was found and includes the expected text, length, heading, and URL signals.

Sitemap Pass 10/10

The sitemap.xml file is valid and contains URL entries.

|                                                                                                                                                                                                                               |      |        |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|--------|
| <b>Markdown support</b>                                                                                                                                                                                                       | Pass | 15/15  |
| The homepage returns markdown content when requested with Accept: text/markdown, giving AI systems a cleaner text representation with less navigation chrome to parse.                                                        |      |        |
| <b>Semantic HTML</b>                                                                                                                                                                                                          | Warn | 8.6/10 |
| Add missing semantic elements: article.                                                                                                                                                                                       |      |        |
| <b>Structured data</b>                                                                                                                                                                                                        | Fail | 0/10   |
| Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.                                                                                                  |      |        |
| <b>Content signals</b>                                                                                                                                                                                                        | Pass | 5/5    |
| Consider adding Content-Signal HTTP header, AI-specific head meta tags, robots noai/noimageai directive so AI systems can consistently discover content usage preferences across robots.txt, HTTP headers, and HTML metadata. |      |        |
