PUBLIC AI VISIBILITY REPORT

www.semaglutidecanada.com

Scanned Jun 28, 2026, 11:01 UTC

OVERALL SCORE

30 /100

Poor

Executive summary

This site is difficult for AI tools to read right now. Key strengths include structured data and content signals, while homepage access and crawler policy need attention. Recommended next step: remove AI crawler Disallow: / rules or replace them with narrower path-level restrictions for private content only.

Recommended next step

1. Remove AI crawler Disallow: / rules or replace them with narrower path-level restrictions for private content only.
2. Remove AI crawler Disallow: / rules or add narrower Allow/Disallow rules if AI crawlers should be able to discover public content.
3. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Signal breakdown

Crawlability

Fail 0/20

Remove AI crawler Disallow: / rules or replace them with narrower path-level restrictions for private content only.

Robots.txt

Fail 0/15

Remove AI crawler Disallow: / rules or add narrower Allow/Disallow rules if AI crawlers should be able to discover public content.

llms.txt

Warn 7.5/15

Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

Sitemap

Fail 0/10

Regenerate sitemap.xml with valid XML and a sitemap <urlset> or <sitemapindex> root element.

Markdown support

Fail 0/15

Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Semantic HTML

Warn 7.1/10

Shorten the title tag to 70 characters or fewer. Shorten the meta description to 160 characters or fewer.

Structured data

Pass 10/10

Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.

Content signals

Pass 5/5

Consider adding Content-Signal HTTP header, AI-specific head meta tags, robots noai/noimageai directive so AI systems can consistently discover content usage preferences across robots.txt, HTTP headers, and HTML metadata.

Suggested fixes

llms.txt

MARKDOWN

```
# Semaglutide in Canada: GLP-1 Guide, Pricing & Providers | Semaglutide  
Canada
```

```
> Semaglutide in Canada: your complete guide to GLP-1 weight loss  
medications. Compare Canadian providers, pricing by province, prescriptions,  
and Health Canada regulations.
```

```
This llms.txt file summarizes the public, canonical resources that AI  
assistants and crawlers should use to understand this site.
```

Site Overview

```
- Canonical URL: https://www.semaglutidecanada.com/  
- Site type: organization  
- Recommended summary: Semaglutide in Canada: your complete guide to GLP-1  
weight loss medications. Compare Canadian providers, pricing by province,  
prescriptions, and Health Canada regulations.
```

Core URLs

```
- [Homepage](https://www.semaglutidecanada.com/): Primary public entry point  
and canonical site overview.  
- [Ozempic Overview](https://www.semaglutidecanada.com/ozempic/): Important  
public page discovered from the homepage navigation.  
- [Cost in Canada](https://www.semaglutidecanada.com/ozempic/cost/):  
Important public page discovered from the homepage navigation.

robots.txt additions

TXT

```
# robots.txt additions  
# Copy these blocks into the existing robots.txt file. Keep current rules  
unless a note calls out a conflicting Disallow.
```

```
# AI crawler access  
# Add explicit Allow rules for blocked AI crawlers; remove or narrow  
conflicting Disallow rules if your crawler target requires precedence.
```

```
User-agent: GPTBot  
Allow: /
```

```
User-agent: ClaudeBot  
Allow: /
```

```
User-agent: Google-Extended  
Allow: /
```

```
# Crawl-rate guidance  
# Add Crawl-delay under a User-agent block when the site needs gentler  
crawler pacing.  
User-agent: *  
Crawl-delay: 10

Content-Signal

TXT

Content-Signal recommendations

Use these directives to make AI-use preferences explicit for compliant crawlers and AI systems. They are advisory signals, so keep them aligned with robots.txt, terms, and access controls.

Recommended values

- ai-train=no: AI model training, fine-tuning, and dataset creation.
- search=yes: AI search indexing, snippets, and discovery.
- ai-input=yes: AI answer grounding, retrieval, and generated-response context.

HTTP response header

```
````http
Content-Signal: ai-train=no, search=yes, ai-input=yes
Content-Usage: train-ai=n
````
```

Best for site-wide or route-specific policies because the signal travels with every response, including pages that AI systems fetch directly.

HTML meta tag alternatives

Add these inside the document `<head>` when server headers are not
