Needs Work

## Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include AI guidance file and plain-text page access, while page structure and content signals need attention. Recommended next step: shorten the title tag to 70 characters or fewer. Add exactly one h1 element that describes the page topic. Add missing semantic elements: main, article, footer. Add visible body copy after script and style removal so the page has at least 200 words.

## Recommended next step

1. Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.
2. Shorten the title tag to 70 characters or fewer. Add exactly one h1 element that describes the page topic. Add missing semantic elements: main, article, footer. Add visible body copy after script and style removal so the page has at least 200 words.
3. Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access.

## Signal breakdown

### Crawlability

Warn 10/20

Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.

### Robots.txt

Warn 7.5/15

Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access.

## llms.txt

Pass 15/15

The llms.txt file was found and includes the expected text, length, heading, and URL signals.

## Sitemap

Pass 10/10

The sitemap.xml file is valid and contains URL entries.

## Markdown support

Pass 15/15

The homepage returns markdown content when requested with Accept: text/markdown, giving AI systems a cleaner text representation with less navigation chrome to parse.

## Semantic HTML

Fail 0/10

Shorten the title tag to 70 characters or fewer. Add exactly one h1 element that describes the page topic. Add missing semantic elements: main, article, footer. Add visible body copy after script and style removal so the page has at least 200

## Structured data

Warn 5/10

Prefer valid JSON-LD and include Organization or WebSite schema.org types in valid JSON-LD for clearer AI interpretation.

## Content signals

Fail 0/5

Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

# Suggested fixes

## Fix Structured data

### HTML

```
<script type="application/ld+json">
