Needs Work

Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include sitemap and structured data, while homepage access and crawler policy need attention. Recommended next step: remove AI crawler Disallow: / rules or replace them with narrower path-level restrictions for private content only.

Recommended next step

- 1. Remove AI crawler Disallow: / rules or replace them with narrower path-level restrictions for private content only.
- 2. Remove AI crawler Disallow: / rules or add narrower Allow/Disallow rules if AI crawlers should be able to discover public content.
- 3. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Signal breakdown

Crawlability Remove AI crawler Disallow: / rules or replace them with narrower path-level restrictions for private content only.	Fail	0/20
Robots.txt Remove AI crawler Disallow: / rules or add narrower Allow/Disallow rules if AI crawlers should be able to discover public content.	Fail	0/15
llms.txt Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.	Warn	7.5/15

Sitemap	Pass	10/10
The sitemap.xml file is valid and contains URL entries.		
Markdown support	Fail	0/15
Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.		
Semantic HTML	Warn	8.6/10
Shorten the meta description to 160 characters or fewer.		
Structured data	Pass	10/10
Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.		
Content signals	Pass	5/5
Consider adding Content-Signal HTTP header, AI-specific head meta tags, robots noai/noimageai directive so AI systems can consistently discover content usage preferences across robots.txt, HTTP headers, and HTML metadata.

MARKDOWN

LaunchOS for Mac - Best Launchpad Alternative for macOS 26 Tahoe

> LaunchOS is the perfect Launchpad alternative for macOS 26 Tahoe. Native app launcher, customizable grid layout, folder management, and full-screen organizer. Download now!

This llms.txt file summarizes the public, canonical resources that AI assistants and crawlers should use to understand this site.

Site Overview

- Canonical URL: <https://launchosapp.com/>
- Site type: organization
- Recommended summary: LaunchOS is the perfect Launchpad alternative for macOS 26 Tahoe. Native app launcher, customizable grid layout, folder management, and full-screen organizer. Download now!

Core URLs

- [Homepage](<https://launchosapp.com/>): Primary public entry point and canonical site overview.
- [Features](<https://launchosapp.com/features>): Important public page discovered from the homepage navigation.
- [Blog](<https://launchosapp.com/blog>): Editorial updates, announcements, and current context.

robots.txt additions

TXT

robots.txt additions

Copy these blocks into the existing robots.txt file. Keep current rules unless a note calls out a conflicting Disallow.

AI crawler access

Add explicit Allow rules for blocked AI crawlers; remove or narrow conflicting Disallow rules if your crawler target requires precedence.

User-agent: GPTBot

Allow: /

User-agent: ClaudeBot

Allow: /

User-agent: Google-Extended

Allow: /

Crawl-rate guidance

Add Crawl-delay under a User-agent block when the site needs gentler crawler pacing.

User-agent: *

Crawl-delay: 10

# Content-Signal recommendations

Use these directives to make AI-use preferences explicit for compliant crawlers and AI systems. They are advisory signals, so keep them aligned with robots.txt, terms, and access controls.

## Recommended values

- ai-train=no: AI model training, fine-tuning, and dataset creation.
- search=yes: AI search indexing, snippets, and discovery.
- ai-input=yes: AI answer grounding, retrieval, and generated-response context.

## HTTP response header

'''http
Content-Signal: ai-train=no, search=yes, ai-input=yes
Content-Usage: train-ai=n
'''

Best for site-wide or route-specific policies because the signal travels with every response, including pages that AI systems fetch directly.

## HTML meta tag alternatives

Add these inside the document '<head>' when server headers are not
