Needs Work

## Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include crawler policy and sitemap, while AI guidance file and plain-text page access need attention. Recommended next step: publish an AI guidance file as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

## Recommended next step

1. Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.
2. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
3. Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.

## Signal breakdown

### Crawlability

Warn 10/20

Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.

### Robots.txt

Pass 15/15

robots.txt allows crawler access and includes Sitemap references.

### llms.txt

Fail 0/15

Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

## Sitemap

Pass 10/10

The sitemap index is valid and the checked child sitemap contains URL entries.

## Markdown support

Fail 0/15

Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

## Semantic HTML

Warn 5.7/10

Shorten the title tag to 70 characters or fewer. Shorten the meta description to 160 characters or fewer. Add missing semantic elements: main, article, nav, footer.

## Structured data

Fail 0/10

Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.

## Content signals

Fail 0/5

Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

## Suggested fixes

### Fix Structured data
