PUBLIC AI VISIBILITY REPORT

seatinghero.com

Scanned Jun 28, 2026, 11:01 UTC

OVERALL SCORE

51 /100

Needs Work

Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include homepage access and sitemap, while AI guidance file and plain-text page access need attention. Recommended next step: publish an AI guidance file as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

Recommended next step

1. Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.
2. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
3. Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.

Signal breakdown

Crawlability

Pass 20/20

The homepage resolves, connects, returns HTTP 200 OK, exposes a canonical URL, and is not blocked by robots.txt.

Robots.txt

Warn 15/15

Publish /robots.txt with explicit crawler rules and Sitemap references so search and AI crawlers can discover site policy.

llms.txt

Fail 0/15

Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

Sitemap

Pass 10/10

The sitemap.xml file is valid and contains URL entries.

Markdown support

Fail 0/15

Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Semantic HTML

Warn 5.7/10

Add exactly one h1 element that describes the page topic. Add missing semantic elements: main, article, nav, footer. Add visible body copy after script and style removal so the page has at least 200 words.

Structured data

Fail 0/10

Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.

Content signals

Fail 0/5

Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

Suggested fixes

Fix Structured data

HTML

```
<script type="application/ld+json">
{
"@context": "https://schema.org",
"@graph": [
{
"@type": "Organization",
"@id": "https://seatinghero.com/#organization",
"name": "Seating Chart Maker for Weddings & Events",
"description": "Create seating charts in minutes with our easy seating chart
maker. Seating Hero helps you design wedding and event table plans
stress-free and ready to export.",
"url": "https://seatinghero.com/",
"logo": "https://seatinghero.com/apple-touch-icon.png"
},
{
"@type": "WebSite",
"@id": "https://seatinghero.com/#website",
"name": "Seating Chart Maker for Weddings & Events",
