

OVERALL SCORE

31 /100

Poor

### Executive summary

This site is difficult for AI tools to read right now. The main areas needing attention are AI guidance file and plain-text page access. Recommended next step: publish an AI guidance file as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

### Recommended next step

1. Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.
2. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
3. Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.

### Signal breakdown

|                                                                                                                            |      |       |
|----------------------------------------------------------------------------------------------------------------------------|------|-------|
| <b>Crawlability</b>                                                                                                        | Warn | 10/20 |
| Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.                         |      |       |
| <b>Robots.txt</b>                                                                                                          | Warn | 15/15 |
| Publish /robots.txt with explicit crawler rules and Sitemap references so search and AI crawlers can discover site policy. |      |       |
| <b>llms.txt</b>                                                                                                            | Fail | 0/15  |
| Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.     |      |       |

|                                                                                                                                                                                                 |      |        |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|--------|
| <b>Sitemap</b>                                                                                                                                                                                  | Fail | 0/10   |
| Publish a valid XML sitemap at /sitemap.xml and reference it from robots.txt so crawlers and AI systems can discover important URLs.                                                            |      |        |
| <b>Markdown support</b>                                                                                                                                                                         | Fail | 0/15   |
| Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.   |      |        |
| <b>Semantic HTML</b>                                                                                                                                                                            | Warn | 5.7/10 |
| Shorten the meta description to 160 characters or fewer. Add missing semantic elements: main, article. Add visible body copy after script and style removal so the page has at least 200 words. |      |        |
| <b>Structured data</b>                                                                                                                                                                          | Fail | 0/10   |
| Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.                                                                    |      |        |
| <b>Content signals</b>                                                                                                                                                                          | Fail | 0/5    |
| Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.          |      |        |

# Suggested fixes

## Fix Structured data

HTML

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@graph": [
    {
      "@type": "Organization",
      "@id": "https://wento.ai/#organization",
      "name": "Wento - AI Text Humanizer",
      "description": "Convert AI Text into human-like content. Wento is an
echowriting model that converts AI or copied text into natural writing that
bypasses AI and plagiarism detectors.",
      "url": "https://wento.ai/",
      "logo": "https://wento.ai/assets/favnew.png"
    },
    {
      "@type": "WebSite",
      "@id": "https://wento.ai/#website",
      "name": "Wento - AI Text Humanizer",
      "description": "Convert AI Text into human-like content. Wento is an
echowriting model that converts AI or copied text into natural writing that
bypasses AI and plagiarism detectors.",
      "url": "https://wento.ai/",
      "publisher": {
        "@id": "https://wento.ai/#organization"
      }
    },
    {
      "inLanguage": "en"
    }
  ]
}
```

## Fix Content signals

HTML

```
<meta http-equiv="Content-Signal" content="ai-train=no, search=yes,
ai-input=yes" />
<meta name="content-signal" content="ai-train=no, search=yes, ai-input=yes"
/>
```
