

OVERALL SCORE

34 /100

Poor

Executive summary

This site is difficult for AI tools to read right now. The main areas needing attention are AI guidance file and plain-text page access. Recommended next step: publish an AI guidance file as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

Recommended next step

1. Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.
2. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
3. Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.

|                                                                                                                                                                                               |      |        |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|--------|
| <b>Sitemap</b>                                                                                                                                                                                | Fail | 0/10   |
| Publish a valid XML sitemap at /sitemap.xml and reference it from robots.txt so crawlers and AI systems can discover important URLs.                                                          |      |        |
| <b>Markdown support</b>                                                                                                                                                                       | Fail | 0/15   |
| Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests. |      |        |
| <b>Semantic HTML</b>                                                                                                                                                                          | Warn | 8.6/10 |
| Expand the title tag to at least 10 characters.                                                                                                                                               |      |        |
| <b>Structured data</b>                                                                                                                                                                        | Fail | 0/10   |
| Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.                                                                  |      |        |
| <b>Content signals</b>                                                                                                                                                                        | Fail | 0/5    |
| Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.        |      |        |
