

OVERALL SCORE

31 /100 Poor

Executive summary

This site is difficult for AI tools to read right now. The main areas needing attention are AI guidance file and plain-text page access. Recommended next step: publish an AI guidance file as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

Recommended next step

- 1. Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.
- 2. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
- 3. Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.

|                                                                                                                            |      |       |
|----------------------------------------------------------------------------------------------------------------------------|------|-------|
| Crawlability                                                                                                               | Warn | 10/20 |
| Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.                         |      |       |
| Robots.txt                                                                                                                 | Warn | 15/15 |
| Publish /robots.txt with explicit crawler rules and Sitemap references so search and AI crawlers can discover site policy. |      |       |
| llms.txt                                                                                                                   | Fail | 0/15  |
| Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.     |      |       |

|                                                                                                                                                                                                       |      |        |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|--------|
| <b>Sitemap</b>                                                                                                                                                                                        | Fail | 0/10   |
| Publish a valid XML sitemap at /sitemap.xml and reference it from robots.txt so crawlers and AI systems can discover important URLs.                                                                  |      |        |
| <b>Markdown support</b>                                                                                                                                                                               | Fail | 0/15   |
| Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.         |      |        |
| <b>Semantic HTML</b>                                                                                                                                                                                  | Warn | 5.7/10 |
| Add exactly one h1 element that describes the page topic. Add missing semantic elements: main, article, nav. Add visible body copy after script and style removal so the page has at least 200 words. |      |        |
| <b>Structured data</b>                                                                                                                                                                                | Fail | 0/10   |
| Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.                                                                          |      |        |
| <b>Content signals</b>                                                                                                                                                                                | Fail | 0/5    |
| Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.                |      |        |

# Suggested fixes

## Fix Structured data

HTML

```
<script type="application/ld+json">
