

OVERALL SCORE

73 /100

AI-Readable

Executive summary

This site is mostly readable by AI tools, with a few improvements still recommended. Key strengths include crawler policy and plain-text page access, while content signals and homepage access need attention. Recommended next step: add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to the crawler policy file, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

Recommended next step

1. Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.

2. Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

3. Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

Signal breakdown

Crawlability Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.	Warn 10/20
Robots.txt robots.txt allows crawler access and includes Sitemap references.	Pass 15/15
llms.txt Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.	Warn 7.5/15

Sitemap

Pass10/10

The sitemap.xml file is valid and contains URL entries.

Markdown support

Pass15/15

The homepage returns markdown content when requested with Accept: text/markdown, giving AI systems a cleaner text representation with less navigation chrome to parse.

Semantic HTML

Warn5.7/10

Add exactly one h1 element that describes the page topic. Add missing semantic elements: main, article, nav, footer. Add visible body copy after script and style removal so the page has at least 200 words.

Structured data

Pass10/10

Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.

Content signals

Fail0/5

Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

Suggested fixes

Fix Content signals

HTML

<meta http-equiv="Content-Signal" content="ai-train=no, search=yes, ai-input=yes" />
<meta name="content-signal" content="ai-train=no, search=yes, ai-input=yes" />
