Needs Work

Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include AI guidance file and sitemap, while plain-text page access and content signals need attention. Recommended next step: add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Recommended next step

- 1. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
- 2. Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.
- 3. Fix robots.txt syntax issues so each rule uses Field: value format, directives appear under a User-agent, and Sitemap entries use absolute URLs.

Signal breakdown

Crawlability Review AI crawler Disallow rules and keep only the paths that should be excluded from AI crawler access; serve a non-empty HTML homepage with a canonical link tag.	Warn 10/20
Robots.txt Fix robots.txt syntax issues so each rule uses Field: value format, directives appear under a User-agent, and Sitemap entries use absolute URLs.	Warn 7.5/15
llms.txt The llms.txt file was found and includes the expected text, length, heading, and URL signals.	Pass 15/15

Sitemap

Pass10/10

The sitemap.xml file is valid and contains URL entries.

Markdown support

Fail0/15

Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Semantic HTML

Pass10/10

The homepage has a valid title, meta description, heading structure, semantic landmarks, substantial body copy, and descriptive anchor text.

Structured data

Pass10/10

Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.

Content signals

Fail0/5

Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

Suggested fixes

Fix Content signals

HTML

<meta http-equiv="Content-Signal" content="ai-train=no, search=yes, ai-input=yes" />
<meta name="content-signal" content="ai-train=no, search=yes, ai-input=yes" />
