

OVERALL SCORE

81 /100

AI-Readable

Executive summary

This site is mostly readable by AI tools, with a few improvements still recommended. Key strengths include AI guidance file and plain-text page access, while homepage access and crawler policy need attention. Recommended next step: serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.

Recommended next step

- Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.
- Fix robots.txt syntax issues so each rule uses Field: value format, directives appear under a User-agent, and Sitemap entries use absolute URLs.
- Add missing semantic elements: article.

Signal breakdown

Crawlability Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.	Warn 10/20
Robots.txt Fix robots.txt syntax issues so each rule uses Field: value format, directives appear under a User-agent, and Sitemap entries use absolute URLs.	Warn 7.5/15
llms.txt The llms.txt file was found and includes the expected text, length, heading, and URL signals.	Pass 15/15
Sitemap The sitemap.xml file is valid and contains URL entries.	Pass 10/10

Markdown support	Pass	15/15
The homepage returns markdown content when requested with Accept: text/markdown, giving AI systems a cleaner text representation with less navigation chrome to parse.		
Semantic HTML	Warn	8.6/10
Add missing semantic elements: article.		
Structured data	Pass	10/10
Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.		
Content signals	Pass	5/5
Consider adding Content-Signal HTTP header, AI-specific head meta tags, robots noai/noimageai directive so AI systems can consistently discover content usage preferences across robots.txt, HTTP headers, and HTML metadata.		

Suggested fixes

llms.txt
MARKDOWN
<pre># ScoreLM - Sports League Management Platform > ScoreLM is the sports league management platform for real game days: league websites, schedules, live scoring, stats, brackets, and ticketing in one place. This llms.txt file summarizes the public, canonical resources that AI assistants and crawlers should use to understand this site. ## Site Overview - Canonical URL: https://scorelm.com/ - Site type: organization - Recommended summary: ScoreLM is the sports league management platform for real game days: league websites, schedules, live scoring, stats, brackets, and ticketing in one place. ## Core URLs - [Homepage](https://scorelm.com/): Primary public entry point and canonical site overview. - [Features](https://scorelm.com/features): Important public page discovered from the homepage navigation. - [Pricing](https://scorelm.com/pricing): Pricing, plans, and packaging information. - [Docs](https://scorelm.com/docs): Documentation and implementation Continued in the full scan report...</pre>

robots.txt additions

TXT

```
# robots.txt additions
# Copy these blocks into the existing robots.txt file. Keep current rules
unless a note calls out a conflicting Disallow.

# AI crawler access
# Add explicit Allow rules for AI crawlers so public content permissions are
clear.
User-agent: Claude-Web
Allow: /

# Crawl-rate guidance
# Add Crawl-delay under a User-agent block when the site needs gentler
crawler pacing.
User-agent: *
Crawl-delay: 10

Content-Signal

TXT

Content-Signal recommendations

Use these directives to make AI-use preferences explicit for compliant crawlers and AI systems. They are advisory signals, so keep them aligned with robots.txt, terms, and access controls.

Recommended values

- ai-train=no: AI model training, fine-tuning, and dataset creation.
- search=yes: AI search indexing, snippets, and discovery.
- ai-input=yes: AI answer grounding, retrieval, and generated-response context.

HTTP response header

```
'''http
Content-Signal: ai-train=no, search=yes, ai-input=yes
Content-Usage: train-ai=n
'''
```

Best for site-wide or route-specific policies because the signal travels with every response, including pages that AI systems fetch directly.

HTML meta tag alternatives

Add these inside the document '`<head>`' when server headers are not
